CHRISTMAS VALLEY, OREGON

15 CENTS

ANNIVERSARY EDITION

## Spectacular Development on All Fronts Marks Anniversary of Christmas Valley

Happy Birthday to you Christmas Valley on your first anniversary.

In 359 days you have made a notable contribution to the recreation and leisure-time industry—an industry reported by the United States Department of Commerce as one of the nation's largest.

You were born in a great state—Oregon, you with your mountains, lakes, streams and plains are becoming one of the important recreation and leisure areas of America.

Your ocean, lake and stream fishing is legendary.

Your deer and antelope hunting attracts thousands.

Other thousands of bird hunters know of your duck, geese, pheasant and sage hen bags.

You are sure to attract your portion of the 20 million hoard coming to the West Coast.

It is obvious that current recreation and residential facilities are inadequate to meet the needs of this population boom and the steady growth in certain types of recreation and leisure land developments seems inevitable.

A large proportion of the population is retiring each year, with Social Security, pension funds and savings.

I see the importance of providing recreation facilities, homes, business and all of the necessary facilities for everyday living. (30 percent of the population is engaged in the services industries.)

He who provides the above will reap pleasure and a handsome profit.

The last few years have been a prelude to the sustained growth as new recreation and leisure development companies have come into being and the old stand-bys have enlarged their program.

Previews of things to come:

20 million population explosion

4 day work week

3 days recreation and leisure

2 car families

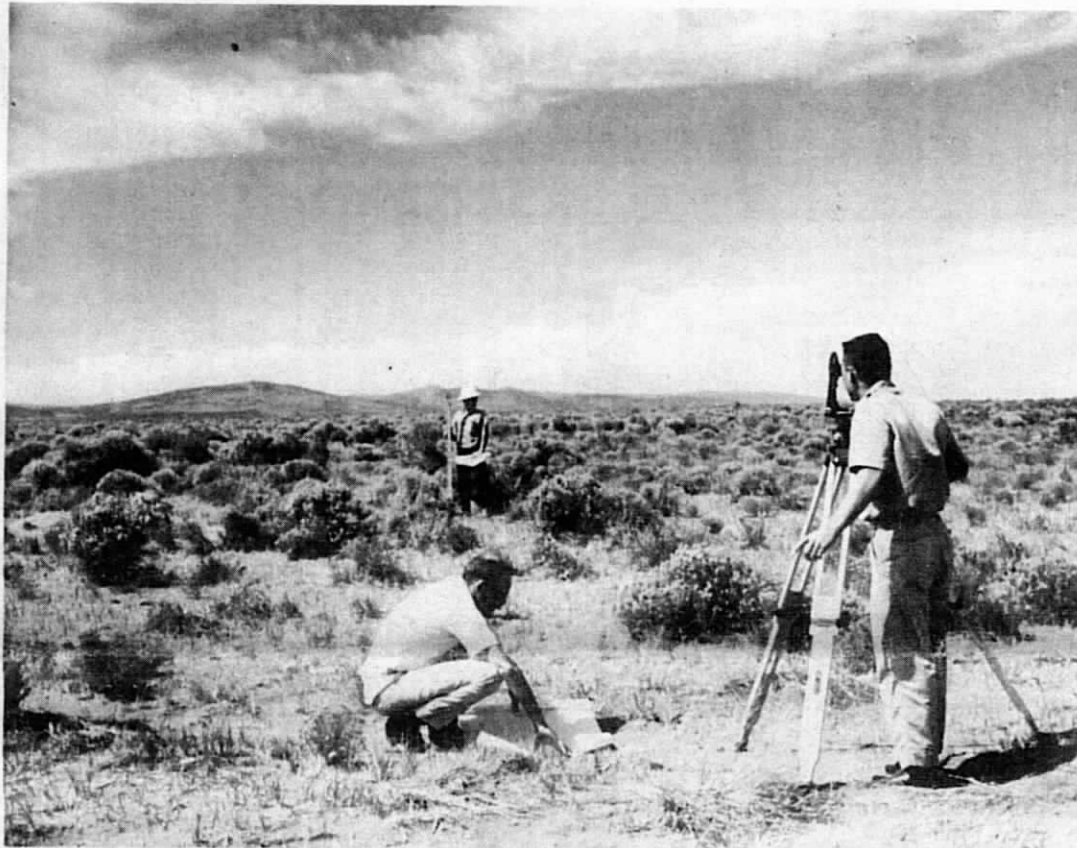

2 house families

2 boat families

Buy land and keep it. Some day it will keep you.

—Penn

### Here's How It All Began Here

**MEN OF VISION MAKE DREAMS TURN INTO REALITY** — Just about a year ago this was the center of Christmas Valley. General Project Manager Phil Washington (center) checks map as surveyor start vast project of laying out town. Compare photo with one below to check fantastic progress.

### Projects Ahead of Schedule After 1st Year

The fantastic story of Christmas Valley is almost suitable to be used as a Christmas fable, so phenomenal has been the growth and progress of this community in the short span of only one year.

Invariably, a Property Owner visiting his land these days after an absence of several months, is flabbergasted at what he sees.

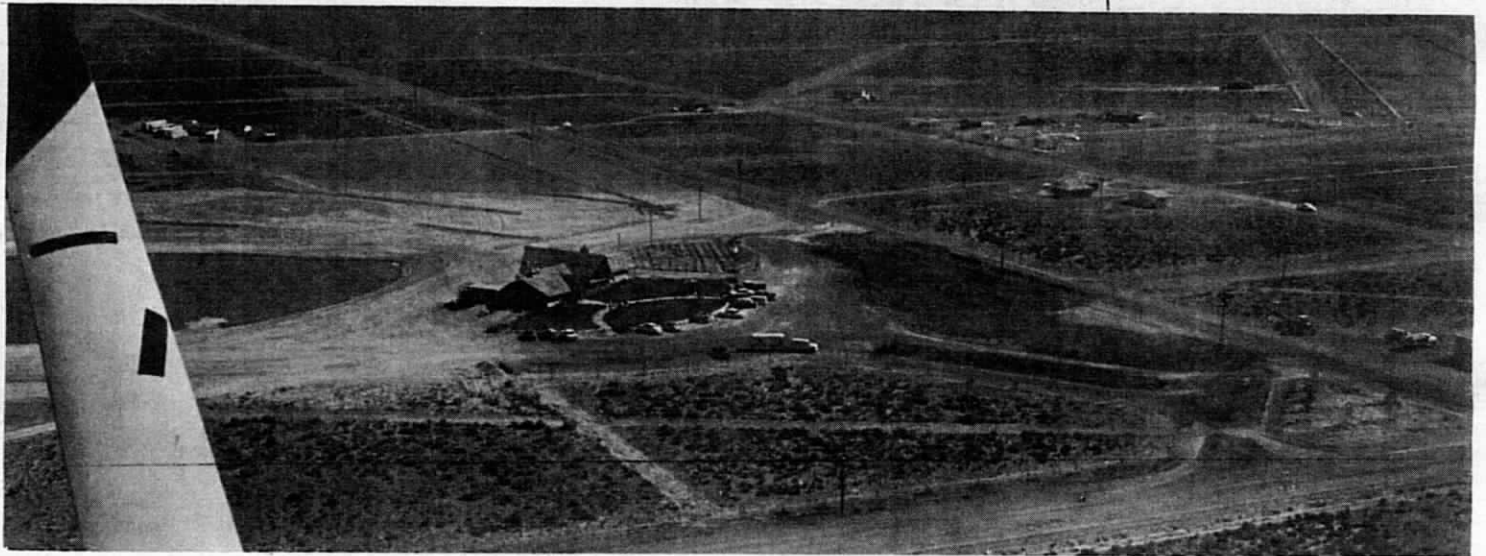

"I see it but I just can't believe my own eyes," is the comment frequently heard. "Why they've done so much here in such a little time that it borders on the fantastic."

#### Spent Over \$1 Million

The M. Penn Phillips Co. has spent more than a million dollars on this development already. And this isn't counting salaries.

More than \$400,000 has been spent on improvements alone in the last 12 months.

To show for this sizable expenditure, there is the showplace of central Oregon — the \$100,000 Christmas Valley Lodge. There is (Continued on Page 3)

**AERIAL VIEW SHOWS REMARKABLE PROGRESS** — It doesn't seem possible that so much construction and development can occur in only one year, but here is the proof of the building. The Lodge, grocery store, sales offices, service station, A-Frame homes, W-2 duplex homes and other private residences all attest to the fabulous growth of the Christmas Valley development.

### 100 INDUSTRIES HIRING 10,000 MOVED TO OREGON IN LAST 2 YEARS

Time magazine, which has one of the largest circulations in the country, recently highlighted the fine work Governor Mark Hatfield was doing to bolster Oregon's economic growth.

Since his triumph in 1958, the publication said Hatfield has concentrated in souping up the state's economy.

"In the last two years, 100 new

industries employing 10,000 workers have come into Oregon; in just two months this summer, \$550 million worth of new commercial construction got under way.

"Hatfield is also the guiding force behind a \$10 million private effort to bring research organizations into the state," the article stated.

## This Time We Outdid Ourselves

By CARLO P. GIUNTINI  
President, M. Penn Phillips Co.

The M. Penn Phillips Co. has the enviable reputation of starting and finishing every development it undertakes. What's more the job is finished on schedule or ahead of schedule.

But this time at Christmas Valley, I must confess that we outdid ourselves.

At the outset of our Christmas Valley project, we had planned on a five-year development program.

I'm happy to say that after only one year's time, progress here has exceeded even our fondest expectations.

Should things continue to go as they have been, in another year we will have completed our Christmas Valley improvement commitments.

To say that these commitments are quite sizable is equally a sizable understatement.

But you can judge for yourself by checking our list of accomplishments.

Why this accelerated program? To put it simply, it's a matter of service.

Our philosophy, or more precisely, our secret of success, is that we do not and do not have to rely on sales dollars to pay for our improvements. Long before we start actual work on a development, a budget is prepared and allocations set up for this specific purpose.

### Improvements, Recreational Facilities First

We feel our Property Owners naturally would like to have all these improvements and recreational facilities as soon as possible. And that's what they're getting at Christmas Valley.

Last April we fully completed the \$100,000 Christmas Valley Lodge, one of the most beautiful structures in Central Oregon.

We expedited construction of our Christmas Valley Dude Ranch to coincide with our staging of the extremely popular Rodeo and Gymkhana and Horse Swapping Days. We were delighted with the fine turnout of more than 3000 people who watched this thrilling two-day Western show.

We hosted many visitors during our Farmers' Land Demonstration Days at our modern 40-acre Model Farm.

Twelve units of a comfortable Motel are in use. Our Christmas Valley Air Park, a 5000 ft. air strip capable of servicing multi-engine aircraft, has been in operation since January.

### Expenditures Amounted to \$1,100,000

We have already invested \$1,100,000, not counting salaries. Our water system alone will cost over \$350,000.

Our golf course and recreation lake are well ahead of construction schedule. Both will be ready for next summer's visitors. We've installed miles of water lines, brought in water wells sufficient for the needs of more than 500 homes, created more than 250 miles of acreage roads, and brought in utilities.

But, as someone once said, "This is only the beginning."

It's a good beginning, to be sure, but there's more to come to Christmas Valley.

Next March we will put into service a unique \$65,000 "Own-Your-Own" Trailer Park. You can buy outright your trailer site instead of renting it.

We will continue our road building as expeditiously as possible. We're creating recreational facilities. We're planning and donating sites for churches and a school for a strong moral community. We're planting trees to lend more beauty to our development.

We're proud of our work at Christmas Valley. We'll be even more so about this time next year.

**BUSINESS AT SALES OFFICE**—Business is brisk these days as many visitors from California, Arizona and eastern states yearn to own property in Christmas Valley. One gets an idea of this intense desire for land ownership from the fact that when the M. Penn Phillips Co. placed 72,000 acres on the market last September, a major portion of it was purchased within the first three months of the sale. Many said they would move to Oregon.

## ENGINEERING WORK COMPLETED FOR CHRISTMAS VALLEY TOWNSITE

The major task of completing the engineering for the Christmas Valley townsite has been accomplished as well as control points and surveying for thousands of acres of ranch property.

The overall water system design has been completed, and work is ahead of schedule on the installation of mains, pressure

tanks and fire hydrants.

We have two wells and pressure tanks connected to the system with a unique cistern-water box which allows surplus water to be diverted to the Christmas Valley Lake.

The combined well and pump capacity is more than 2,000,000 gallons of water a day.

## MORE THAN 250 MILES OF ACREAGE ROADS INSTALLED IN ONLY ONE YEAR

More than 250 miles of acreage road have been installed at Christmas Valley in just one year, reports Project Manager Warren Morton.

The M. Penn Phillips Co., as developer, pays for the construction of all roads and streets.

Morton stressed that "we build well-engineered roads, correctly graded and strengthened with

bonding agents and rock materials for greater durability."

Lake County has agreed to accept and maintain these roads immediately upon their completion, which bears out Morton's statement.

This means Christmas Valley Property Owners are relieved of future financial responsibility in regard to costly road maintenance.

## SAGEBRUSH SPRAYING RESULTS IN FAR GREATER LAND PRODUCTION

Excellent results were reported on the View Point Ranch after 3200 acres were sprayed to kill sagebrush in the Spring and subsequently most of the area was seeded to crested wheat in the fall of 1961.

Ordinarily, brush spraying is done only where there is adequate grass to fill in the space taken by the sagebrush.

However, the View Point land was supporting little or no native grass and was of little value as grazing land.

### Grass Growth Soars

Now since the area has been sprayed and seeded, Don Hedrick,

Assoc. Professor of Range Management at Oregon State University, estimates it will produce 300 to 400 pounds of air dry grass per year, judging from the amount of crested grass present.

Six to eight acres of this land now will support a cow whereas previously it took 30 to 40 acres to support one cow. The cost of this spraying-seeding operation was only \$6.50 an acre.

The project is one of the first and largest of its kind in which sagebrush was sprayed and grass seeded into the standing brush.

The Bureau Land Management provided the drills for seeding the area.

## MODERN DAIRY PLANT BEING SET UP FOR CHRISTMAS VALLEY

Fresh milk right here in Christmas Valley.

That's the pleasant outlook for local residents in the very near future.

"Peggy Daly of Madras told me she is very much interested in establishing a dairy operation on our Model Farm," revealed general project manager Phil Washington.

"We have had several meetings on this and feel we can go ahead with the project. Betty has had

much experience in dairy farm operations so we should have a fine plant here," he said.

"Residents would be assured of a top grade product. Peggy has only purebred Guernsey dairy stock, a breed famous for its milk and butter content all over the country.

"This will be a sizable operation here. Betty has all the plans for a modern plant including automatic mechanical milkers," Washington added.

## HISTORY OF LAKE COUNTY

(Continued from Page 10)  
bead, with the end ground off, came from this level.

Between 75 and 100 sandals were removed from the stratum under the pumice. All of the sandals were more or less charred, as was all inflammable material from under the pumice.

It was decided that the layer of pumice was evidently sufficiently hot enough when it fell to ignite the inflammable materials. All of these sandals were made on the same pattern and from the same material; shredded sagebrush bark.

And so we find the evidences of Early Man's occupation some 4,000 to 10,000 years ago in the caves of Lake County. Further evidence of Early Man are the petroglyphs, or Indian writings, which are also to be found at many sites throughout Lake County.

(Copyright 1959 by  
Betty Morehouse)

## Snapp Pleased With Potato Crop

W. A. Snapp, successful Madras rancher and grower, recently inspected the growth of the potato crop at the Modal Farm and was pleased with the results.

Snapp recommended the planting of seed potatoes and said it would be a good crop to grow here in Christmas Valley.

# SUCCESSFUL BUILDERS OF THE WEST

## Phillips Co. Paves Way for Progress

### SPECTACULAR ANNIVERSARY

(Continued from Page 1)

also a first class air park, a 40-acre Model Farm, a 12 unit motel, a fully equipped dude ranch and quarterhorse racing strip, a nearly completed golf course, a nearly filled recreational lake, hundreds of miles of roads and a water system capable of servicing 500 homes right now.

#### Private Industry Expands

Private industry has kept pace with the company.

A grocery and general store, a service station and garage, a lumber yard, home construction firms, land clearing, sagebrush spraying and well drilling operations, a ready mix concrete company all stand poised to do their share in the continued expansion of Christmas Valley.

The pace hasn't slackened.

#### Cacophony of Progress

The sound of hammers on nail and wood blend with the sound of wrenches on pipe and the throaty roar of bulldozers in a cacophony that shrieks progress, growth and expansion for Christmas Valley.

This is the pattern set in the first year of our community.

### Land For Church Sites Donated By Carlo Giuntini

"It is our sincere and dedicated intention that Christmas Valley will have a healthy moral atmosphere. With this thought in mind, we are donating sizable parcels of land so that many churches, regardless of denomination, will provide religious services for our residents."

These were the words of Carlo P. Giuntini, president of M. Penn Phillips Co.

Accordingly, Giuntini has donated one acre parcels to three different religious groups who have signified their intention to build churches here.

#### Plan Community Building

Catholic, Congregational and Lutheran church officials have requested church sites here and have been awarded acreage by Giuntini.

"When conditions warrant it, we will consider constructing a community building for use by all religious groups. Here they could alternately hold their church services and social functions," added Giuntini.

### Baseball Diamond Due For Kiddies

Attention parents! Do you have any future Mickey Mantles in your family? Your boy can show his stuff next summer here in Christmas Valley.

The M. Penn Phillips Co. is donating land to build a regulation baseball diamond. As conditions warrant it, various baseball leagues will be established here.

### Brown at Conference

Mel Brown of the Christmas Valley sales staff and Nick Klerk and Bud Parks of the Fort Rock-Silver Lake Soil Conservation District recently attended the "Land and People" conference in Portland.

**CRACK MANAGEMENT TEAM**—This quartet of key executives runs the M. Penn Phillips Co. and has made it the success it is. Preparing to fly to Christmas Valley in the company's private plane are, from left, M. Penn Phillips, founder of the company; Carlo P. Giuntini, president; Penn Thayer, vice-president, plans and engineering, and Phil Washington, general project manager.

## Teamwork, Experience Spell Success of Company

The M. Penn Phillips Company believes that teamwork in management is the key to success is running a multi-million dollar organization with a 40-year history of successful community development.

A close-knit organization where the executives of the company have known and worked with one another for many years, the company is well aware of the advantages of teamwork; knowing what every department is doing, how it is doing and when it plans to finish what it is doing.

Founder M. Penn Phillips has grouped the following men around him to plan and guide the orderly progress of Christmas Valley. The key executives of the company have had over a half century of combined experience in the real estate field.

#### Giuntini President

Heading the team is Carlo P. Giuntini, President. Giuntini has been associated with Phillips as his chief executive for almost two decades. As president, he directs all sections of the company's operations: engineering, planning, administration and sales, as well as developing the overall program, with Phillips, of the Christmas Valley development.

His extensive background has made him one of the top, young executives in the real estate field.

#### Washington Project Mgr.

Phillip O. Washington, General Project Manager, has been with Phillips most of the last ten years. Starting as a construction field supervisor in the company's building department, he showed a decided knack for the sales field.

When the community of Hesperia was first opened for public sale in October of 1954, Washington was made sales manager for the project.

#### Heads Engineering

Except for a short period of time in the late 1950's, when he ran a successful construction and sales business in Hesperia, he has been associated with Phillips

and Giuntini in a sales executive position.

Penn Thayer, head of Planning and Engineering, is the youngest of the executive team. A short but extensive background in the field, plus a well-rounded education and a "head for business" have placed him in his present position.

Chief executive at Christmas Valley is Warren W. Morton, who is in charge of all development and building. Morton's responsibilities are to build roads, the lake, the golf course, the installation of utilities, build homes and business places. And he is ideally qualified for the job.

#### Morton Supervises

Morton has supervised the special building projects of Phillips' and Giuntini's since the Hesperia development. He was construction supervisor of the beautiful Hesperia Inn and Country Club; the ultra-modern Salton City administration building at the Salton Sea; as well as supervising the building of hundreds of homes and business places in both communities.

He spends most of his time at the project, flying his own plane between the Valley and the Los Angeles area.

#### Construction Supervisor

Construction supervisor on the site is Harold Boyer. The Boyers live in Christmas Valley. Boyer is the newest of the men who form the team, but has had a long and varied background in the building field.

Such are the men who make your Christmas Valley project "go." They know their jobs, know them well, so the future of Christmas Valley is in good, capable hands.

## Has Reputation of Completing Any Community It Starts to Develop

BY M. PENN PHILLIPS

Our company enjoys the enviable reputation of completing any community it undertakes to develop. And the improvements are accomplished with the finest materials and workmanship.

One of the main reasons our company has enjoyed the success it has is that we do not rely on sales dollars to pay for these improvements.

Funds are allocated for all this work BEFORE the development is even placed on the market.

All the work it takes to build a complete community is begun almost simultaneously.

Our staff of trained experts makes an over-all design or master plan of the area, determining where the residential, recreational, civic, church, commercial and industrial areas should be and their relationship to each other.

When this plan has been approved, and the pattern set for development, budgets are compiled, funds allocated, schedules of completion are set and the work itself is started — drafting, surveying, engineering, purchasing, earth moving, road work, construction, housing and all the other phases of development that will convert the raw land into the finished product.

Before land can be used it must be developed and "packaged" in units that can be utilized.

This is one of the primary reasons California has (Continued on Page 12)

## Phillips Land Empire

The M. Penn Phillips Company story is as legendary and fabulous as that of its founder, astute and affable M. Penn Phillips.

His fame is such that he "made the cover" of Time magazine, a station reserved for the greats of the world.

Since his advent into land development in 1922, Phillips has successfully transformed 500,000 acres of heretofore unused land into flourishing communities and resorts.

His successes are recorded in four states and Mexico. Here is a thumbnail list of his developments:

**CLEAR LAKE, CALIFORNIA**—Developed resort and home resort in 1922. More than 10,000 lots were purchased by the public. Hotel and club built. It is now one of the outstanding resorts in the state.

**FRAZIER MOUNTAIN PARK NEAR BAKERSFIELD, CALIFORNIA**—Resort and home development sold in 1924.

**VISTA, CALIFORNIA** — In 1926 developed the avocado groves of Vista into farms and home sites. It is now considered to be one of the most desirable places in which to live.

**COOS BAY, OREGON**—Acquired 10,000 lots and developed these into resort area with industry. Sold this in 1929. Coos Bay is a lumber and manufacturing center.

**LAS VEGAS, NEVADA**—Developed and sold many of the properties in 1932. Today, on this land are located the famous hotels of the "Vegas Strip."

**KINGMAN, ARIZONA**—Company sold thousands of acres in 1932. Today, Kingman is a major railroad center on the Santa Fe line.

**ENSENADA, MEXICO**—With Jack Dempsey, heavyweight boxing champion of the world, Phillips developed area here in 1932. They built the modern resort hotel, the Playa del Pacifico in Ensenada.

**PALMDALE-LANCASTER, CALIFORNIA**—Pioneer developer in Antelope Valley in 1937. Experts recently predicted the area will have a population of 1,000,000 in 1975. The company still builds an average of 30 homes a month in this area.

**LAKE ARROWHEAD AND BIG BEAR LAKE, CALIFORNIA**—In the late 1940s, hundreds of lots in this area were developed and sold. Built a club for the purchasers of the property.

**HESPERIA, CALIFORNIA** — Purchased 23,000 acres in 1954. Built championship golf course, \$1,000,000 Hesperia Inn and other facilities. Population has zoomed from 143 in 1954 to 6000 today. There are 636 children in two grammar schools.

**VICTORVILLE, BARSTOW, SAN BERNARDINO, RIVERSIDE, CALIFORNIA** — Since 1950 the company has specialized in development work in these High Desert areas.

**GREATER LOS ANGELES AREA** — In San Gabriel, Azusa, Baldwin Park, Compton, Surfside, Glendora — the list is almost unending of the many communities the company has developed, both industrially and residentially.

**SALTON CITY, CALIFORNIA**—Purchased 19,600 acres in 1958 and developed complete sea-desert recreation resort on Salton Sea.

**CHRISTMAS VALLEY, OREGON**—Purchased 72,000 acres of rich land on eastern side of the Cascades in the heart of Oregon in September, 1961. Will develop complete community with recreational facilities second to none.

# Christmas Valley Offers Recreation To Please All

**BIG CATCH, BIG VARIETY**—M. Penn Phillips happily offers lasting proof that a variety of good fishing exists around Christmas Valley. Phillips caught six different kinds of fish—channel catfish, black bass, rainbow trout, ring perch, black crappie and blue gill—in one day on Tahkenitch Lake. There are 500 miles of fishing streams and seven major lakes, all teeming with numerous game fish, right here in our Lake County.

**EASIER THAN TRAVELING BY WAGON TRAIN** — Sam Morehouse, who homesteaded here 42 years ago, happily zooms boat over new Christmas Valley Lake. Sam has driven cows, horses and has ridden prairie schooners but said, "I never thought I'd ever see the day when I'd be riding a motor boat right here in the middle of the Valley."

## CHRISTMAS VALLEY LAKE TO OFFER FISHING, BOATING, WATER SKIING

This is for the benefit of air-men flying over beautiful Christmas Valley. No that's not a mirage you see; it's the huge Christmas Valley Lake.

At least it's about two-thirds of the lake. The rest of it will appear very shortly.

Christmas Valley Lake, which will be administered by the Christmas Valley Mutual Water Improvement District in strict compliance with State and Federal rules and regulations, won't exactly be a pond.

It will be more than two-thirds of a mile long (3500 feet), with a capacity of 176 acre-feet and an area of 26 acres.

Christmas Valley Lake will be from 325 to 600 ft. wide and will be from 6 to 10 feet deep, thus eliminating much danger to young

children.

The remaining portion of the lake is currently being dredged. When the operation is completed, there will be launching ramps for water ski boats and sea room for small sailing craft.

A protected sandy beach is already in use.

"We'll have much to offer residents, Property Owners and visitors," said Phil Washington.

"We're going to stock the lake with plenty of bass, blue gill, crappie, catfish and trout.

"Besides fishing and swimming, there'll be boating and water skiing in a portion of the lake set aside especially for these sports. And of course, there'll be plenty of land for holding old-fashioned family style picnics," said Washington.

**DEER SHOT RIGHT IN CHRISTMAS VALLEY'S BACK YARD** — Project Manager Warren Morton (left) and Bob Byam, project plumber at Christmas Valley, proudly pose with deer they shot last week. Morton got 4-point buck, while Bob was satisfied with his 3-point. Lake County abounds in game. Last year alone, 10,000 mule deer were taken here. Oregon was second only to Texas in the number of deer taken in 1961. Game officials say there are more deer and elk here now than there were 10 years ago.

**CHRISTMAS VALLEY DEAD AHEAD** — Youngsters Brian and Ivan Savage and Phil Menges are shown aboard the "I. W. Harper," a barn-red and white Spanish Galleon they built from pictures they saw in history books. Boys, who spent only week in building boat, hurried up the job so boat would be ready when M. Penn Phillips visited Christmas Valley. Note outriggers, something Spaniards didn't have on their galleons. Boys explained that the galleon would tip otherwise. Trio since has "sold" the boat to David Lemke and John McLister, both 10 years of age. Ducks and pelican also like boat.

**PRIZE HORSES AT DUDE RANCH** — These are the beautiful animals available to equestrians at Christmas Valley Dude Ranch. Ralph Fullington, shown with three of his 10 horses, arranges long rides in the beautiful Oregon countryside for visitors at reasonable rates. Dude Ranch is a complete facility with rodeo arena, corrals, paddocks, tack room and irrigated pasture. It also has a quarter mile racing strip for Quarter Horse racing, plus a snack bar. Completed way ahead of schedule, the Dude Ranch was opened with a successful Wild West Rodeo, Gymkhana and Horse Swapping Days. Event attracted 3000 people from several states who watched cowboys compete for \$5000 in prizes.

## \$2,000 Pro Tourney, Junior Golfing Planned

To go along with a first class golf course, President Carlo Giuntini is also planning some first class golf events for the Christmas Valley Golf Course.

"When we open our fine course for play next summer, I intend to conduct a pro-amateur tournament here. I'm thinking now about a purse of \$2000. With this kind of money at stake, I'm reasonably sure we will attract the top golf professionals in the state of Oregon," said Giuntini.

The Christmas Valley Pro-Am would be a major attraction for this area.

Another important project Giuntini intends to inaugurate is a top junior golf program.

### Junior Golf Important

"Junior golf is very important to any community," said Giuntini. "It gives the boys and girls an outlet for their energy and furnishes them with competitive sports, whether they play against an opponent or just the golf course."

Meanwhile, Giuntini said he was very pleased with the progress of the course, which incidentally, he designed.

### Greens, Fairways Seeded

Joe Ward, golf course superintendent, reports that most of the greens have been seeded, as well as the fairways and the driving range area. The practice putting green near the Lodge already is lush and usable.

"We've been getting some good stands of grass on the fairways," said Ward. "Soon we'll start to augment the blue grass now growing on the fairways with Italian Rye grass. The greens have been seeded with a strain of bent grass best suited for this area."

### Sprinkler Lines Installed

Installation of three miles of pipelines has been completed. The course water system features the newest sprinkler heads available. These can cover a 180 to 200 ft. circle and can deliver three-quarters of an inch of water in only one hour.

The scenic and sporty 9-hole Christmas Valley course, which was designed to test the skill of a great player and still provide enjoyable golf for a duffer, will measure 3405 yards but can be extended to 3500 yards for tournament play.

### Equipment Building

The course will carry a par of 36. There are two par-3 holes, two par-5 holes and five par-4 holes.

The first hole is the shortest at 170 yards. The longest is the 545-yard 6th hole, a difficult assign-

## COURSE, SPORTS FACILITIES WILL DRAW TOURIST \$\$

This may come as a surprise to Property Owners at Christmas Valley, but last year visitors trebled the number of residents in the state of Oregon.

That's right. In 1961 more than three times as many people visited Oregon than there were people living in our beautiful state.

The tourist trade is the state's third biggest industry.

### Tourism Big Business

It's an industry worth a whopping \$312,000,000 to Oregon each year. Of these tourists 46% come from California. A great many of these people expressed a desire to locate in Oregon.

This is one of the reasons we are creating the finest recreational facilities possible to attract a great number of visitors from all over the country.

### Demand Services

Visitors will come here to play golf on our Christmas Valley golf course, to fish, boat, swim, ride horses, hike, ski and rockhound.

These people will need gasoline, meals, lodging, groceries, equipment, mechanical work, hunting and fishing and camping information — all the services that people demand today to make their vacations enjoyable.

The expenditures of these tourists, together with the needs of ranching and farming communities surrounding Christmas Valley, will provide the payroll that will attract families.

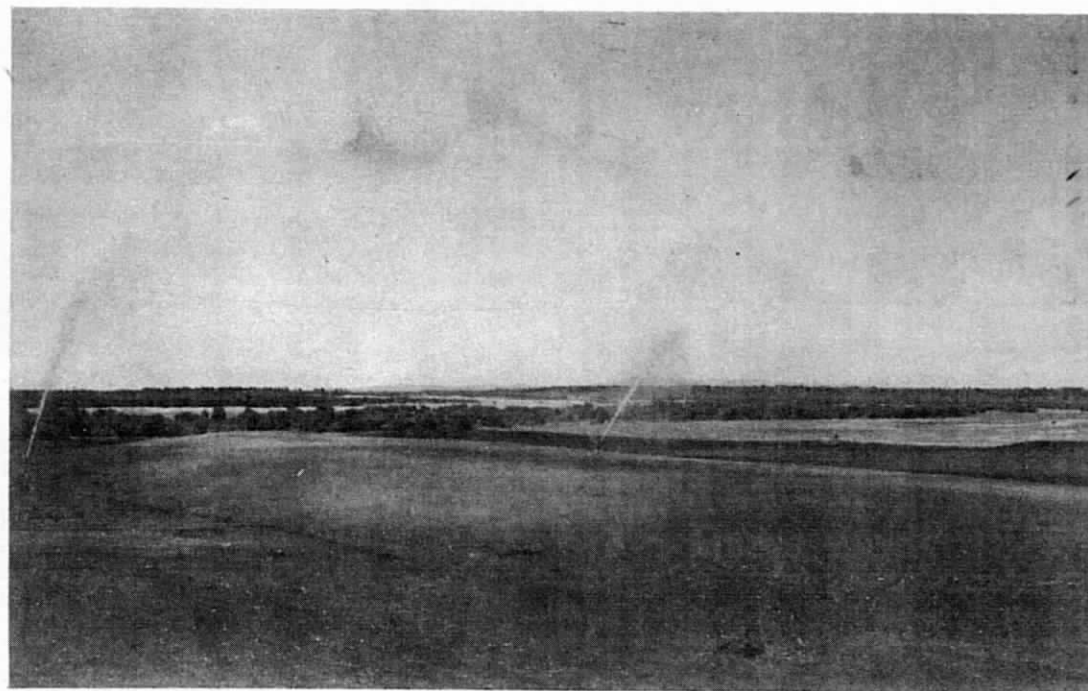

### Higher Land Value

These families in turn will require gasoline, groceries, haircuts, hardware, mechanical repairs and homes.

Thus we see that the entire cycle will be started again. The result? More people. More demand for less available land and subsequent higher land values.

ment for even a pro

Ward said work is progressing on a golf course equipment building to house the tractors, mowers and spreaders.

**GOLF COURSE TAKES SHAPE AND COLOR** — Giant sprayers employing newest sprinkler heads send out watery spray in 180 to 200 foot circle. These sprayers are capable of saturating the fairways and greens with three-quarters of an inch of water in only one hour. Most of the greens and fairways have already been seeded. Green grass is now beautifying the countryside. The sporty 9 hole course, which will be about 3500 yards in length, will be open for play early next summer.

**GOLFER CAN HARDLY WAIT** — Young Mel Brown, Jr., impatiently waiting for the Christmas Valley Golf Course to open, tries his putter on the big practice green right near Lodge. Lush green is indication that the special strain of bent grass selected by Carlo Giuntini will flourish in this area. Many greens have been seeded.

## Corum Kids Ride Bikes

Mike and Kelly Corum sure did want to see their grandma, Connie Baert, at Christmas Valley.

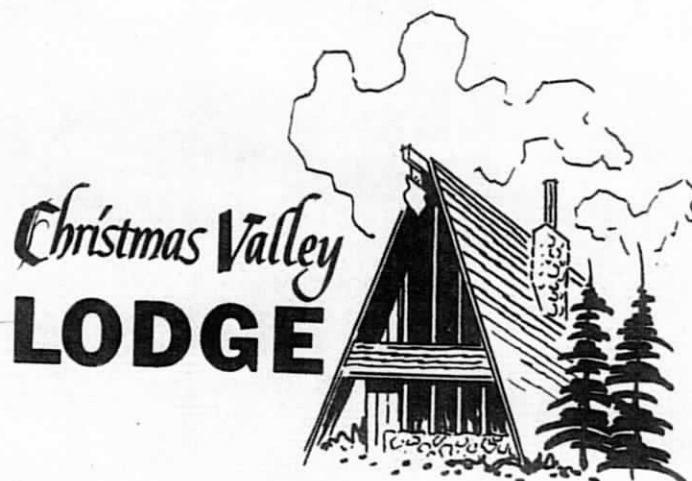

The two youngsters peddled their bikes 16 miles from Eagle Rock to pay their respects.

You don't suppose that Connie's opening of the new Christmas Valley Grocery Store had anything to do with it, do you?

## Coyote Goes Shopping

One of Connie Baert's "customers" at her Christmas Valley Grocery Store is a tamed coyote.

The pet coyote went into the new store, grabbed a package of dog food and was about to exit, before he was halted at the check station.

**FINE FOOD**

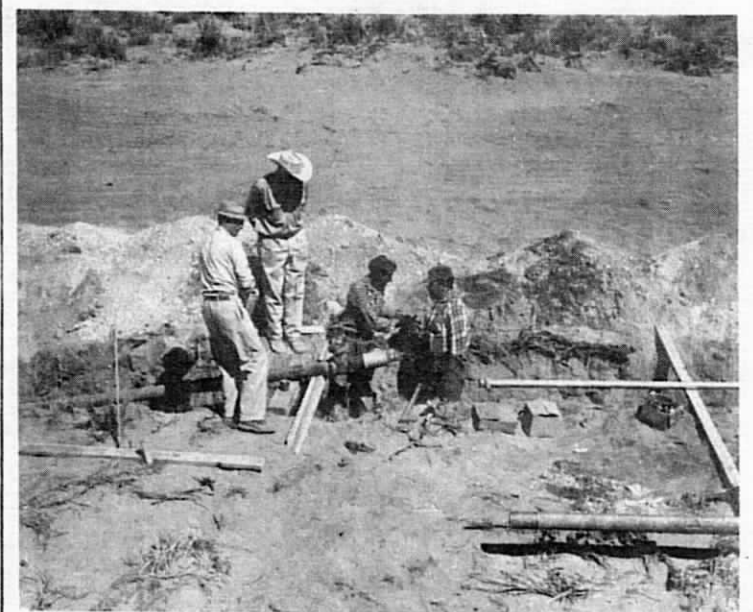

**Year Round Hunting  
and Fishing**

**CHRISTMAS VALLEY LODGE**

P. O. Box 41

Silver Lake, Oregon

Phone: 576-2270

**CREWS INSTALLING PIPES** — Workers are shown adding to the total of 32,855 ft. of pipe already put in service for the water supply system here. Another mile of pipe is being put in the ground to service the residents of the Christmas Valley townsite.

BEAUTIFUL \$100,000 CHRISTMAS VALLEY LODGE—One of the finest buildings in Central Oregon, the Lodge is the center of recreation, civic and social activity here. Meeting of clubs and various organizations (including the Bend Chamber of Commerce) are held here. Lodge is an attractive Alpine type structure with entirely modern facilities. It is highlighted by a massive blackstone fireplace. Note wishing well in foreground of picture. Most Property Owners are wishing they could be here right now.

LOCAL AND VISITING WRITERS GET VIP TREATMENT—M. Penn Phillips proudly shows features of his \$100,000 Christmas Valley Lodge to Betty Morehouse (left), pride of local journalistic circles, and Rosalie Fay, feature writer for the Los Angeles Herald-Examiner. All three plus other visiting writers stayed to enjoy one of Ann Cater's fabulously prepared fish fry dinners. Lodge is very popular spot.

## Christmas Valley Lodge Social Center of Area

The imposing \$1,000,000 Christmas Valley Lodge unquestionably is the showplace of Central Oregon.

The Alpine structure is the social center of the community. Civic, social and business groups hold their meetings here. The Bend Chamber of Commerce and the Fort Rock-Silver Lake Soil Conservation District officials have held meetings in the spacious Lodge.

The Lodge contains entirely modern facilities despite its Alpine architecture. The central portion, under the exposed beams of the peaked roof, is occupied by the dining tables and upholstered window seats. The room is highlighted by a massive blackstone fireplace.

Modern kitchen facilities take up most of one wing, together with a cozy bar.

### Food Gourmet's Delight

In the opposite wing are rest-room facilities and a game room for guests.

The food at the Lodge is out of this world. The menu is variable enough to satisfy the tastes of even the most discerning gourmet.

This is just another service of the M. Penn Phillips Co. to give Property Owners and residents a meeting and social place for their enjoyment and pleasure.

## RECREATIONAL FACILITIES AT LODGE ENLARGED

Not that the fresh, clear and smog-free air of Christmas Valley isn't enough to give you a hearty appetite, but if you need a little exercise to do the job, we're going to accommodate you so you won't miss out on Ann Cater's superb culinary talents.

The M. Penn Phillips Co. announced it will build several recreational facilities in the area near the luxurious Christmas Valley Lodge.

"We plan to install all kinds of playground equipment for the kiddies," said president Carlo Giuntini. "We are also expanding our recreational outlets by furnishing horseshoe pits and badminton courts."

In addition to these, golfing, swimming, boating, water skiing, fishing and picnicking facilities will be available.

WHO WEARS THE CHEF'S HAT? —In this case Ann Cater does. Ann, who is famous for her culinary talents, takes care of visitors' hunger, while cheerful and capable Eddie takes care of their thirst at the Christmas Valley Lodge. One of Ann's specialties is Horse-blanket hotcakes. Why are they called that? Why, because the hotcakes are as big as horse blankets.

FIRST LOAD OF LUMBER—You've got to start sometime and this is what happened here about a year ago. Builders, surrounded by supplies of lumber, prepare to go to work on the Christmas Valley Lodge, one of the prettiest buildings around.

# Christmas Valley Already Boasts Numerous Businesses

## Congressman Aids Our Request For New Post Office

A post office for Christmas Valley moved one step closer to reality after an examination of our bustling community and a subsequent letter by a post office department official to Oregon Congressman Al Ullman.

Frederick C. Belen apprised the Congressman of the development of Christmas Valley and the advisability of creating a postal facility for community identity purposes.

Wrote Belen:  
"Honorable Al Ullman  
House of Representatives  
Washington 25, D.C.  
Dear Congressman:

This refers further to your interest in the establishment of a postal facility at Christmas Valley, Oregon.

At present there is not sufficient postal business to be generated to warrant an independent post office; however, more convenient service can be given the community by establishing a rural station if reasonable contractual agreement can be obtained. This would provide a named postal facility for community identity purposes.

Rural stations provide the same service as small independent post offices which includes general delivery and box service; sale of stamps and money orders; registered, insured, certified and COD service.

Patrons could have their mail addressed to Christmas Valley and call at the postal facility for it.

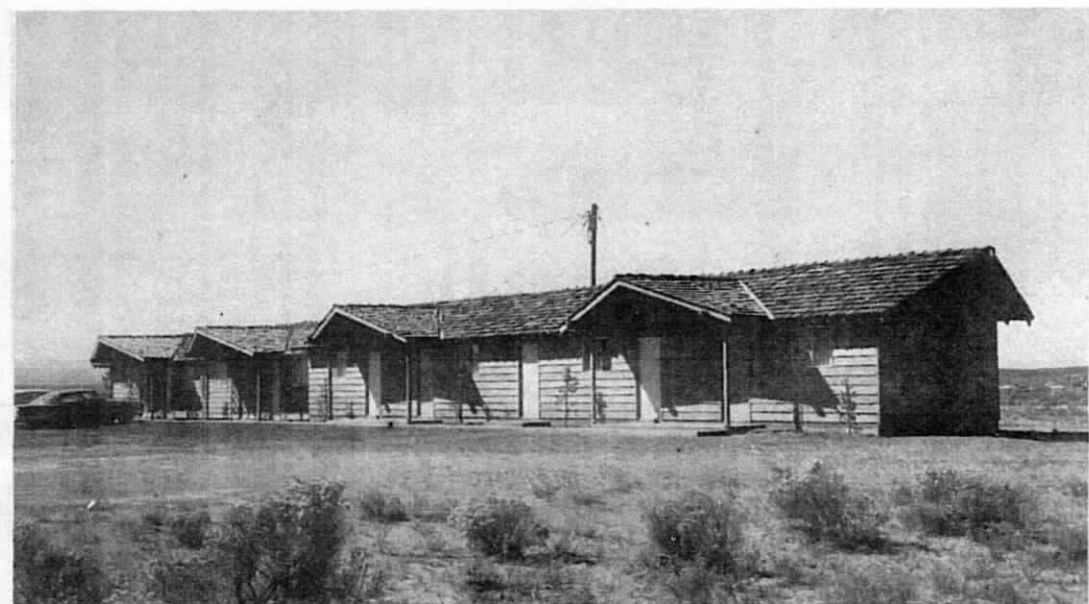

Efforts are being made to obtain a reasonable agreement for the operation of a rural station and we will inform you of the results as promptly as possible."

### Fourth Class Post Office

General Project Manager Phil Washington said that if a suitable bid can be obtained from Al Baert for the pickup and delivery of our mail, it appears we would have a fourth class post office here at Christmas Valley

**PLENTY OF SUPPLIES IN STORE FOR THE KIDDIES**—Youngsters Pat Murphy, David Lemke and Jeff Cater seemed overwhelmed at the huge supply of goodies they see in the new Christmas Valley Grocery Store. Connie Baert operates store with her husband, Al. Store is located on the corner of Christmas Valley Lane and Christmas Valley Road. It is a spacious 2000 square foot building. Baerts carry a complete line of groceries, vegetables and meats. They are adding hard goods to their combination grocery and general merchandise store. Post Office will probably be housed in this store.

**NEW UNITS OF CHRISTMAS VALLEY MOTEL**—Since the first four units were completed in December, 1961, eight more units have been added to it. Clean, spacious and comfortable rooms at low prices are featured at the Motel. Motel is centrally located and within short walking distance of the golf course, store, lodge and lake. Fred and Hazel Thompson, veteran restaurant and motel operators, said they plan to expand the facilities here, in keeping with the growth trend in Christmas Valley.

within the next few months.

The post office would be located in Al and Connie Baert's Christmas Valley Grocery Store.

## Phone Service, Electricity Now Available Here

Electricity and telephone service are presently available in certain areas of Christmas Valley at the moment, with more being readied every month.

In other areas, extensions will be made on proper application to the public utility. It may be necessary in some cases for the users to advance deposits for such extensions.

Electricity is served by the Midstate Electric Co-op, operating under the Rural Electric Administration.

Pacific Northwest Bell Telephone Co. supplies the telephone facilities.

A community owned water company, The Christmas Valley Mutual Water Improvement District services the townsites only with piped water. This system is now in operation and will be extended within its boundaries as the need arises.

ton.

"With this new business, we will have a lumber yard near at hand to supply the greatly expanding building program at Christmas Valley.

Christmas Valley, in the remarkably short time of one year, is becoming a self-sufficient community, thanks to the united efforts of the M. Penn Phillips Co. and private business and industry.

There aren't many things a housewife or a do-it-yourself builder can't obtain here right now.

Food, clothing, gas, light, heat, lodging, farm and building supplies are readily available here.

### Support Merchants

Christmas Valley businesses include Al and Connie Baert's Grocery and General Store, Bill Stanfill's Shell Service Station and Garage, Duffy Knorr's redimix Concrete Co., Fred and Hazel Thompsons Christmas Valley Motel, Don Klaus' Christmas Valley Lumber Co., Ralph Fullington's Dude Ranch, Gordon Goeres Well Drilling Service;

John Pettus' land clearing and farm contracting, the Ginny Simms Melody Homes and W-2 builders and others are here to serve you.

Support these and other merchants who will establish businesses here. They will help you and the combination will make the economical cycle here spin.

## Ducks, Pelican Move to Lake

There's plenty of activity on the Christmas Valley Lake even though the 26-acre recreational facility hasn't been completed.

Numerous ducks have taken residency on the lake. They were joined the other day by a pelican.

The Christmas Valley staff is making every effort to make the waterfowl comfortable in their new home.

The ducks and pelican occasionally climb aboard a small boat, a replica of a Spanish galleon, which is floating around the lake.

**LUMBER YARD OFFICE BEING BUILT** — Workmen are shown erecting lumber yard facility just south of Christmas Valley Road. Lakeview Lumber Co. will conduct business here on 10-acre site. Lumber yard will offer better services and lower prices to residents.

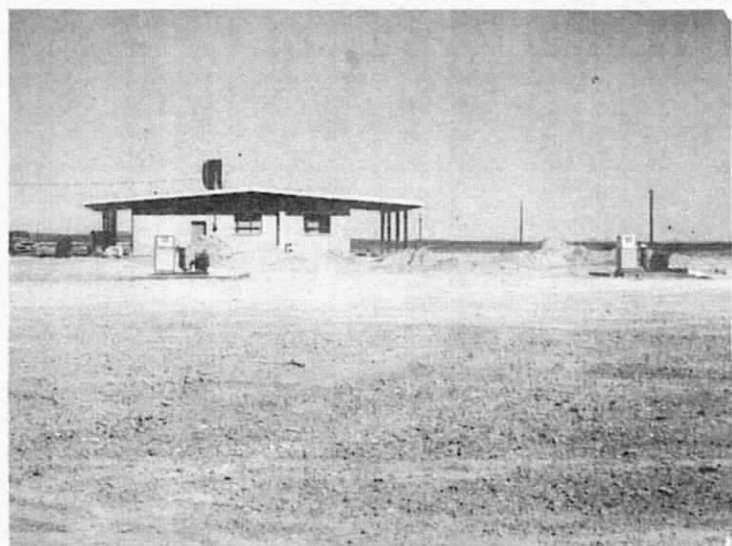

## LAKEVIEW COMPANY BUILDING NEW CHRISTMAS VALLEY LUMBER YARD

Don Klaus, president of the Lakeview Lumber Co., said he expects shortly to complete his new building for conducting a lumber business in Christmas Valley.

The facility, which will be built on 100 acres of land purchased

on the south side of Christmas Valley Road, will be called Christmas Valley Lumber Co.

"This is an important contribution to the development of our community," pointed out General Project Manager Phil Washing-

**NEW GASOLINE STATION** — Photo shows big size of Shell Service Station and Garage, located off Christmas Valley Road near the tie-down area on the west end of the Air Park. Owner Bill Stanfill will sell gasoline retail and wholesale, as well as aviation fuel. Since photo was taken, work on station has been finished.

## NEW GASOLINE SERVICE STATION READY FOR CAR, PLANE BUSINESS

You won't have to worry about running out of gas at Christmas Valley anymore. Not unless you don't watch your gasoline level or are too far away from the Christmas Valley Air Park.

That's where Bill Stanfill Sr. has opened his modern Shell Service Station and Garage, located off Christmas Valley Road.

"We'll have wholesale and re-

tail selling of regular gas, aviation gasoline, diesel fuel and other related products," said Stanfill.

The new Shell facility will carry the newest and finest equipment to cope with any motoring problems.

The sizable concrete block building has a board and batt exterior, in keeping with the general architecture of this area.

# Crops Flourish, Animals Thrive at Model Farm

They've changed the name of the Experimental Farm to the Model Farm here at Christmas Valley. And with good reason. They don't have to experiment; they know many crops and vegetables can be grown here profitably and that farm animals will thrive here.

Revis Joiner, manager of the 40-acre Model Farm, was highly enthusiastic at the first results.

## REPORT SAYS SOIL GOOD HERE, FREE OF ALKALI SALTS

"The soil in the general area of Christmas Valley is good soil, free from alkali salts.

"It is well supplied with humus, organic nitrogen and major available plant foods such as nitrates, phosphates and potash."

This was the report of a soil analysis undertaken by an outstanding research organization, the Twining Laboratories, Inc.

The report also said "the land is low in available calcium and sulfates. This can be corrected by the application of gypsum.

This healthy appraisal of Christmas Valley land was borne out in the first year of operation of the Model Farm.

Mint, grain, oats, alfalfa, potatoes, turnips, carrots, radishes, beets and hothouse tomatoes all took hold here.

"Everything just took ahold here. Our mint crop is doing just swell. So are the grains, oats and alfalfa. The tomato plants in the plastic hothouse bore good fruit. And we've had success with potatoes, turnips, carrots, radishes, beets and other row crops.

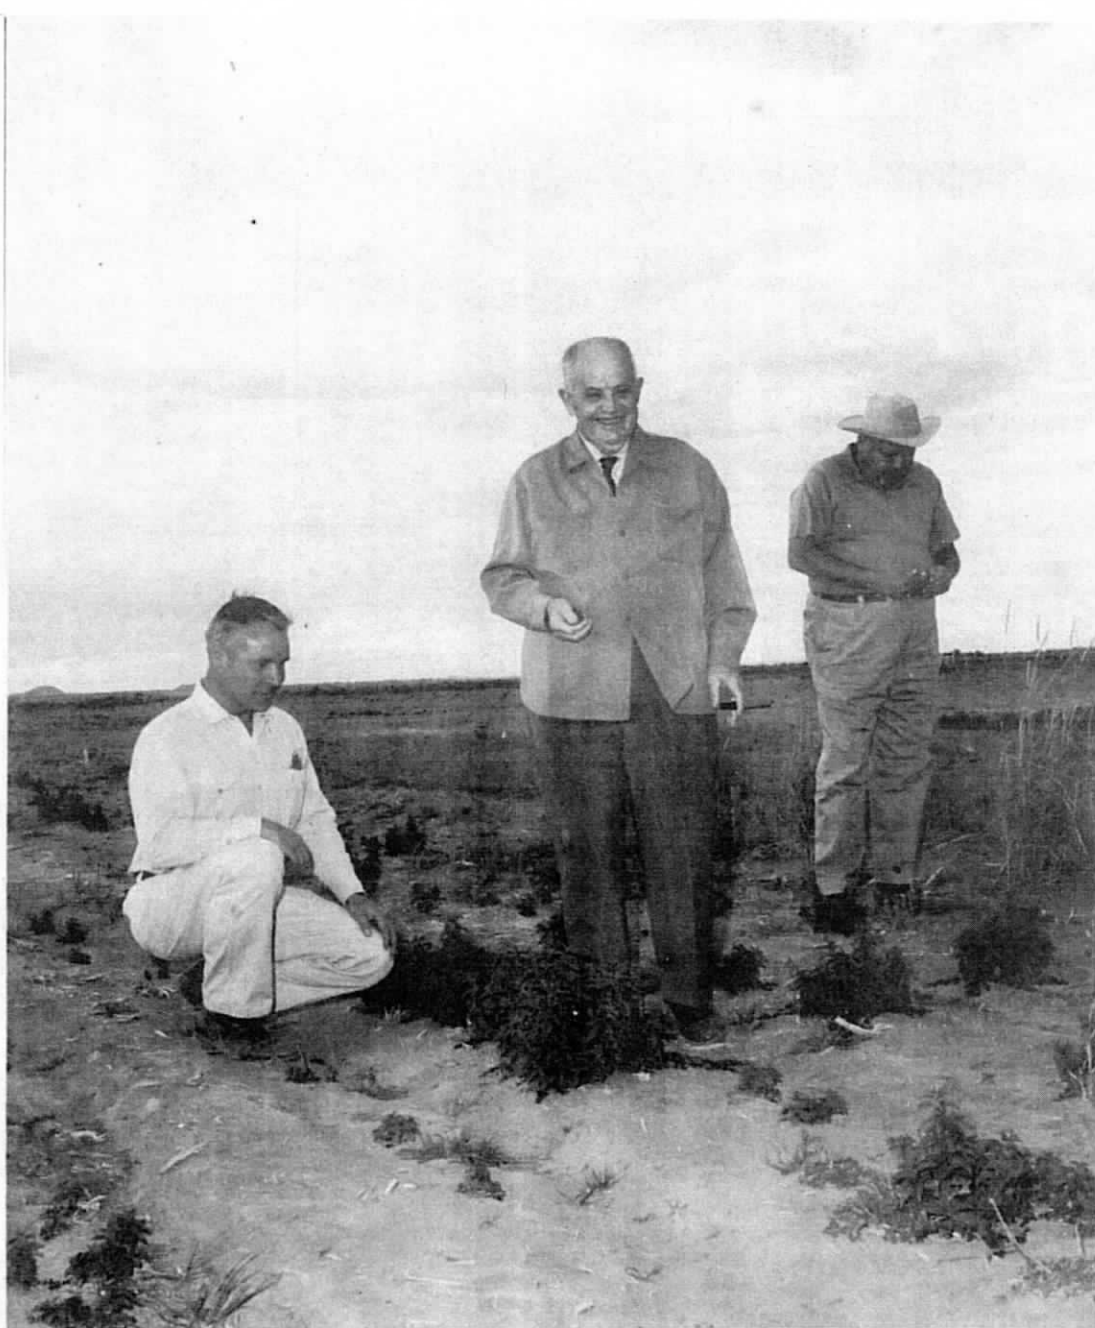

"The animals are doing well, too," said Joiner. "Our poultry, pigs, sheep and cows like this living."

Revis is working in close cooperation with the Oregon State College Agricultural Extension Service and the Fort Rock-Silver Lake Soil Conservation District.

Students from the College have been working at the Model Farm to gain knowledge toward bettering farming and ranching operations here and throughout the state of Oregon.

These operations will indicate the way to many economical and improved farming and ranching practices.

Information received from these experiments will be made available to property owners.

**M. PENN PHILLIPS PLEASED WITH GROWTH OF MINT CROP**—Company founder smiles pleasantly as he smells blossoming crop of mint, which was planted this year at the Christmas Valley Model Farm. Project manager Warren Morton (left) and Mel Thayer, manager of Lodge, share Phillips' enthusiasm. Mint crop is said to be one of the more profitable ones that can be readily grown in here.

## Expert Gives Encouraging Report on Growth of Mint Crop at Model Farm

W. A. Snapp, successful mint grower from nearby Madras, visited out Model Farm on Sept. 20 and gave his report on our mint crop planted on the Model Farm.

Grower Snapp said the "mint is doing just about what I expected." The following are his comments:

A portion of this area was fertilized in excess of 350 lbs. per acre. It appears that 250 lbs. would have been adequate. Where 250 lbs. of fertilizer was used, the mint is growing well.

Snapp said he will make arrangements to take samples this year and prepare the mint for the winter season. By next year we should have a full 1 1/4 acres since Snapp will add more roots in the area where excessive fertilizer was used, plus the existing plants which are rooting nicely.

In the state of Washington, the price of mint has jumped from \$2 a lb. to \$4. This, of course, is a low grade of mint.

Snapp said he has two or three buyers who are interested in purchasing the oil that can be obtained from mint in the area, but until we obtain samples it would be too soon to say that we will have a rich mint crop.

### Good for Area

However, from all appearances, the land in Christmas Valley is suitable for growing mint. The yield should be approximately 60 lbs. an acre.

It appears the cost of preparing the soil and planting of mint will still run from \$150 to \$200 per acre. Therefore, it would be advisable to cultivate 40 acres or more.

**NICE CROP OF TOMATOES**—Project manager Warren Morton is ready to sample some of these ripe beauties which were grown this summer in plastic hothouse on Model Farm in Christmas Valley. Morton assured everyone tomatoes are tastiest he's ever eaten.

## 400 TREES TO BE PLANTED HERE

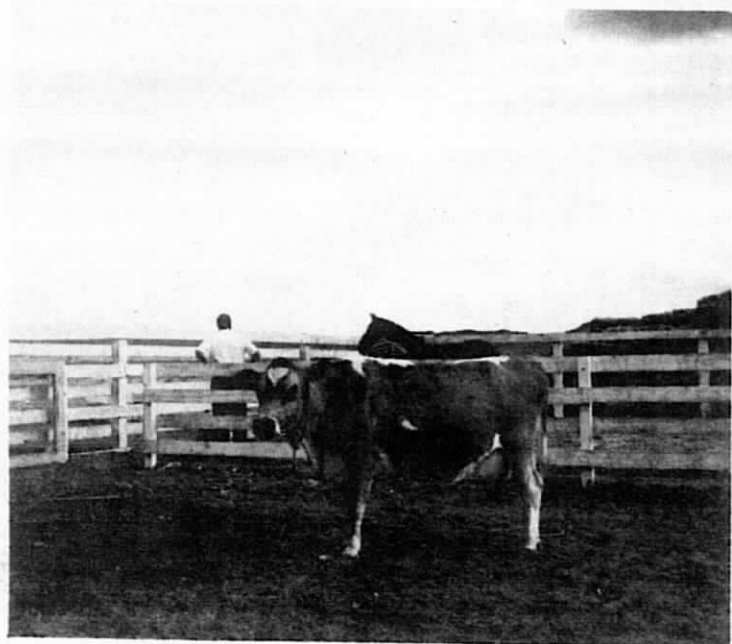

At least 400 trees will be planted around the Christmas Valley Golf Course next spring, giving beauty, shade and additional trouble to golfers.

Many of these trees will be native to the area.

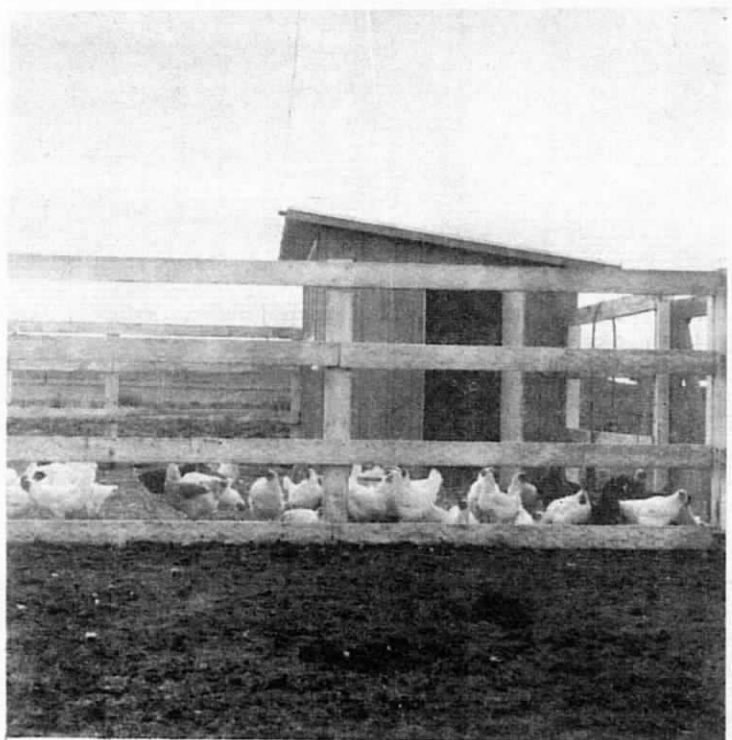

A nursery has been set up for

native pines but the majority of the trees planted will be poplars, elms, cottonwoods and silver maples.

Another 400 silver maple trees will be planted around the Christmas Valley townsite.

**PEDIGREE GUERNSEY COW**—This is the type of animal which will star in the modern milking plant being planned for Christmas Valley. Peggy Daly of Madras is conferring with company officials to conduct a dairy farm on the Model Farm grounds. Only pure bred Guernsey dairy stock will be used to supply fresh milk.

**NOBODY HERE BUT US CHICKENS**—There's plenty of eggs and drumsticks represented in this photo at the Christmas Valley Model Farm. Raising chickens could be one of the flourishing sidelines to go along with regular farming and ranching operations.

# Home Building Program Still on Upgrade

**POPULAR A-FRAME HOUSE**—Inspection party, led by M. Penn Phillips, checks over the Christmas Valley A-Frame building, a contemporary lodge style home. Home sells for \$3990. House is sold only as a basic structure. The foundation, all framing, walls and floor are finished watertight and painted inside and out. It is designed with the idea in mind that the buyer can finish the interior of the home, using only ordinary hand tools. Model home is located at Phillips' main office, 742 N. Loren Avenue in Azusa, Calif. Property Owners, friends and interested parties are invited to inspect home.

**ROOMY INTERIOR** — M. Penn Phillips Co. secretary Barbara McKinley sits on sofa in the A-Frame home, popular priced homes now being built for property owners in Christmas Valley.

**BIG BEDROOM** — Pretty Barbara McKinley isn't going to sleep on the job. She's demonstrating big size bed which the A-Frame home is easily capable of accommodating. Homes are popular.

## A-Frame Homes Proving to Be One of Most Popular Models in Area

One of the best indications that the home construction program is keeping pace with the rest of the flourishing activity here is the fact that every one of the model homes built by the M. Penn Phillips Co. has been sold and moved into.

Certainly one of the most popular types is the A-Frame House, a contemporary lodge style home, ideal for this area.

The house is sold only as a basic structure. The foundation, and framing, walls and floor are finished watertight and painted inside and outside.

### Do It Yourself

The A-Frame House, which sells for \$3990, was designed with the idea in mind that the buyer can finish the interior of the home using only ordinary hand tools. And one needn't be an expert carpenter to do a good job.

These A-Frame Houses are surprisingly larger than they appear. Pictures on this page show the roominess of the buildings.

Another phase of the building boom was the completion of W-2 Duplex Homes by outside private builders.

These fine duplex homes are 1200 sq. ft., not including garage space.

Another private contractor, Ginny Simms Melody Homes, also offers fine homes to Christmas Valley Property Owners.

Phil Washington said 100% financing for these homes is available to qualified property owners.

### Outside Financing

Financing also has been provided to private contractors by the U.S. National Bank of Bend

## Company Donates 10-Acre Parcel for Grammar School

The M. Penn Phillips Co. has set aside a 10-acre parcel as the future site for a Christmas Valley grammar school.

"This may seem premature to some people," admitted Carlo P. Giuntini, "but we must look to the future and plan far ahead."

"We know from our personal experience when we developed Hesperia that the increased population of children can sneak up on you."

"When we started our development at Hesperia in 1954 there were only 19 grade school students in the area. Today, only eight years later, there are 636 pupils in TWO grammar schools," pointed out Giuntini.

and the First National Bank of Lakeview.

Property Owners in Southern California who are interested in seeing the A-Frame Homes may visit a model at the M. Penn Phillips Co. Main Offices at 742 No. Loren Ave. in Azusa.

### \$65,000 PROJECT

## 'Own-Your-Own' Trailer Park to Open in March

Sometime in March of 1963 one of the most important developments of the 60s in trailer park operations will be achieved here in Christmas Valley.

That's the time when the \$65,000 "Own-Your-Own" Trailer Site facility will have been completed.

As part of the trailer park, private individual trailer sites will be offered for sale — not rent — to people who enjoy permanent trailer life.

"The Christmas Valley Trailer Park will be one of the most luxurious and most modern transit-trailer facilities in the country," said Penn Thayer, vice-president in charge of planning and engineering.

### \$40,000 Recreational Building

"Initially, we're going to build 32 of these trailer spaces, though our not-so-distant plans call for an 80-space trailer park," said Thayer.

Plans are well under way toward construction of a \$40,000 trailer clubhouse or recreational building.

The building will have club meeting rooms, game rooms and laundry facilities, all grouped around a beautiful lounge.

### Private Boat Docks

Architecture will be heavy post and beam construction and will be similar to the Christmas Valley Lodge.

Occupants of the trailer park will have access to private docking and beach facilities on the lake, as well as barbecue pits and outdoor game facilities.

A person can own his own boat dock, launch pad and have all the modern utility hook-ups.

**W-2 DUPLEX HOMES COMPLETED** — New phase of booming home construction program here was the building of these two homes by private outside builders. Duplex homes have 1200 sq. ft. each, not including garage space. Phil Washington said 100% financing for these homes is available to qualified Property Owners.

**FIVE TRAVIS CHILDREN AND PONY THEY WON** — Healthy kids proudly show the Shetland Pony, named Skooter, which they won in a raffle. Christmas Valley employees bought pony and held drawing to help pay the hospital bills of injured Blas Monterey, a refugee of Castro's Cuba. Blas has recovered quite nicely.

## Christmas Valley Happy Arrowhead Hunting Grounds

The Christmas Lake Valley, home of the early Indian, is possibly the richest arrowhead hunting ground in the United States.

Every year thousands of arrowhead hunters come to Christmas Lake Valley to indulge in this fascinating hobby.

Arrowhead hunters enjoy a special form of insanity as they tramp for miles and hours. They feel the day is a complete success if they can hold in their hand one tiny, perfect arrowhead. There is an indescribable feeling as they marvel at the exquisite form and the balance of an arrowhead which some prehistoric artist had created with his primitive tools.

### Mostly Obsidian

Most of the arrowheads found in Christmas Valley are made of a form of obsidian, black, red, or clear as glass. Some are made of white agate or red jasper. They vary in size from less than half an inch in length to six inches or more.

In adjacent Fort Rock Valley, the well-known Cow Cave, excavated by archeologists from the University of Oregon, revealed evidence of habitation as far back as 9000 years.

A cave on nearby Cougar Mountain also contained the same kind of artifacts.

### Many Surface Finds

Arrowheads dug from these caves can also be picked up at numerous sites throughout this Christmas Lake Valley. These are designated as surface finds.

Betty Morehouse of Christmas Valley has one of the finest collections of arrowheads in the area. Mel Thayer, manager of the Christmas Valley Lodge, also has a beautiful collection on display in the Lodge.

FIRST RESIDENTS OF CHRISTMAS VALLEY — Helen and Bob Byam are shown on their favorite look-out rock. Couple tells of the good times and friendly relations enjoyed by residents here.

## First Residents Relate Early Day Experiences

Just a little over one year has gone by since we, Bob and Helen Byam, drove in to Christmas Valley pulling our house trailer behind the station wagon. Our passengers were our 3 Siamese cats and 2 dogs. No horse.

There was only vast open space, no buildings, no cars, no people—nothing but sagebrush and blue sky as far as the eye could reach. As we drove in the 25 miles from the nearest town, Silver Lake, we mentioned what a beautiful, quiet and peaceful country Christmas Valley was—but the question in our minds was whether people would really buy this land and move out here.

We found the site of the temporary trailer court, parked our trailer next to the one other which M. Penn Phillips Company had sent up from Azusa, and there we were. The first night, with the coyotes howling around us, the moon a full circle brightly lighting the sagebrush desert country, it was easy to feel that we were really all alone in a completely new and different country.

### Things Began to Hum

The next morning Harold Boyer and his wife, Velma, and their son, Mike, drove into the valley and brought in another trailer in which they were to live. Harold was the building superintendent sent up from Azusa to begin the project and to set it up in the way M. Penn Phillips had planned.

An engineer and his assistant drove up from Azusa to begin the vast amount of surveying and engineering which had to be accomplished before any buildings could be constructed. Bob being a plumber, found plenty to do right from the start.

Phil Washington, general manager of the Christmas Valley arrived, put on his jeans and soon things began to boom. Fencing was started, well rigs appeared upon the scene and the busy sound of tractors clearing roads, well rigs thumping busily, was heard from dawn to dusk.

### First Barbecue

I believe the first barbecue we had at Christmas Valley, in front of our trailers, will always be remembered by the eight of us who participated. Phil bought T-bones, I made the salad and garlic bread, and Bob cooked the meat over an open charcoal fire. Of course there were some liquid refreshments, too.

Harold Boyer was always busy many hours each day, figuring plans and coordinating the various workmen whom he hired from

neighboring communities.

Duffy Knorr brought in a portable cement plant from Redmond—and by the way, Duffy is still here. He has bought property and has his family moved in here now.

Carpenters were hired — Coy Amacher, Archie Osborne from Lakeview and Owen Holmes who also is still here in his own house with his wife Nina.

Al Baert brought in his heavy equipment and started grading and graveling the big airstrip which was one of our first projects here. Al, a year later, is still working here on various projects and his wife Connie has the first grocery store in Christmas Valley — a very important part of the community to all of us.

### Progress Everywhere

The first and most greatly needed building was an office and warehouse. This was started in September and finished in October. Of course we have enlarged our offices since that time — instead of two offices, we now have six in addition to the warehouse in the rear of the building.

The next building was the beginning of the motel units. The first four units were begun in September and finished in October. And now, just one year later, there are twelve units in our motel buildings.

All through the winter months of 1961 construction went on in Christmas Valley at a steady pace. The Model Farm was built, the beautiful Lodge was completed by January, 1962 — model homes constructed — water lines run — The Dude Ranch grounds and corral laid out — more wells dug — and trees and grass started springing up in areas all over the townsite.

### Build Real Community

I think the camaraderie which has existed in this development throughout our entire stay here has been an element which Bob and I have both enjoyed to the utmost. For instance — when Phil Pitman, who lived in the trailer next to ours, used to call out the window "Come on over and eat with me — I have some venison out of the freezer and I'm frying some of my special red potatoes."

Or when our station wagon had a couple of flats and we had no more spares to put on until we could get to Silver Lake for repairs, someone would always volunteer their car for our use — they might say "Bring back a couple of quarts of milk for the baby, but keep the car as long as you need it."

Each family's problems have

# History of Lake County Proves Fascinating

(This is the fourth and final installment tracing the ancient history of Christmas Valley and the surrounding areas.)

BY BETTY MOREHOUSE

The evidence is unmistakable that the Early Man of the eastern Oregon country was witness to some of the last large scale eruptions of the Cascade volcanoes in Oregon.

All artifacts taken from the two caves are designated as those from above the pumice and those from below the pumice.

The artifacts from the two caves were strikingly different. The stone tools found in the Fort Rock Cave showed a remarkable difference from those of the Paisley Cave. The Fort Rock Cave had large numbers of shredded sagebrush sandals, while the Paisley Cave, in the upper level, had Tule sandals. Basketry was almost totally absent from both caves.

### Paisley Cave — Above Pumice

Stone pieces were comparatively few in number. Small ovoid scrapers, triangle-shaped scrap-

ers and small crudely retouched scrapers were found. Two possible dart points and seven arrowheads were found. All specimens were of obsidian. Also found was one paint mano and a metate stained with red pigment.

Two wooden artifacts were found, possibly a dart foreshaft of greasewood, and a fire-drill foreshaft.

One fairly complete sandal and the front halves of a pair, together with scattered fragments, came from the pumice. These were made of tule.

Three very small fragments of twined basketry were found. These were also made of tule.

### Paisley Cave—Below the Pumice

The artifacts from below the pumice in Paisley Cave were few. The occupation under the pumice was not continuous to the bedrock but was broken by sterile section.

There was one small piece of shredded sagebrush bark mat, a small knotted piece of two ply shredded sagebrush bark rope, which might have been a part of a sandal, and a two ply twisted basketry warp. There were no wooden artifacts.

Stone artifacts found included the butt end of an Atlatl (dart) point. The Atlatl was used by Early Man before the innovation of the Bow and Arrow.

The Atlatl was a primitive spear throwing device, which gave the hunter great leverage and power for hurling his shafts of wood or stiff reeds, tipped with sharpened bones, antler tines or stone points. Still used by the Tarascan Indians of Mexico, the Atlatl takes its name from the language of the Aztecs, whose prowess with the spear thrower founded an empire.

### Fort Rock Cave — Above the Pumice

The wooden pieces found consisted of a sharpened needle-like specimen; a foreshaft of a fire-drill; the trigger for a trap; a broken piece of greasewood, pointed at one end; and the possible small fragment of an Atlatl shaft.

The projectile points found included both Atlatl and arrow points. Some 81 specimens were collected. Sixty-three scrapers, two drills, and one mano came from this level.

### Fort Rock Cave — Below the Pumice

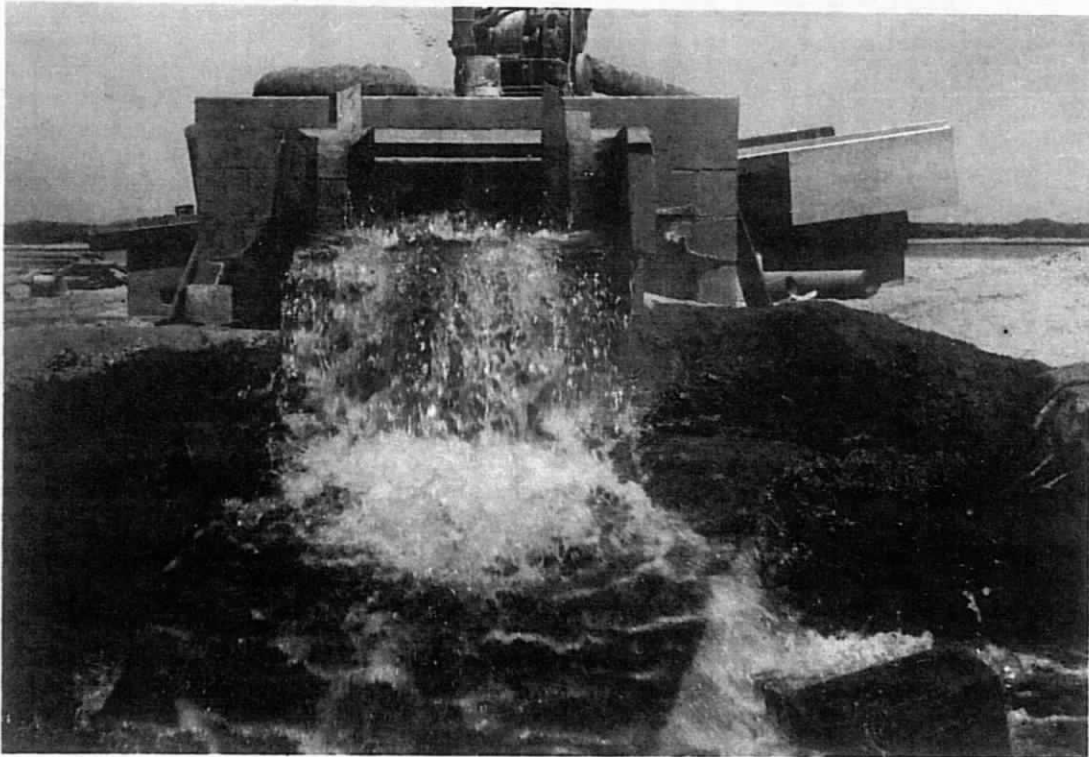

Only one small piece of basketry was found at this level, possibly made of tule. Wooden specimens were represented by a fragment of a simple fire-drill; and a partially burned piece, which may have been a part of an Atlatl.

Two bone awls were found; one was made from the rib of a large animal, and the other from the tibia of a small animal, perhaps a coyote.

A flaking tool made from a deer antler was found. Nine stemmed projectile points, and various fragments were found. Eighty-five scrapers of all kinds, two large drills, four maros and a possible shaft polisher were extricated. One small olivella shell

(Continued on Page 2)

# CHRISTMAS VALLEY WATER PLENTIFUL

**PLENTY OF COOL, COOL WATER**—Everyone seems pleased watching the flow of water going to fill the big Christmas Valley Lake. Water, which is plentiful in this area, will fill the 26-acre lake, which will be created as a multiple recreational facility featuring all water sports.

**SECOND BIG WELL PROVES TO BE A REGULAR GUSHER**—Well No. 2 at Christmas Valley has a capacity of 2000 gallons of water a minute. This is enough to adequately supply the needs of 500 housewives. First well, which has a capacity of only 300 gallons a minute, is still in service. Drilling second well was necessary because tremendous growth here caused outgrowing of initial water supply.

## 2ND BIG WELL HERE CAN SUPPLY ENOUGH WATER FOR 500 HOMES

The second well drilled at Christmas Valley by the M. Penn Phillips Co. has a capacity of

2000 gallons of water a minute, which is enough to accommodate easily the needs of 500 homes.

By way of comparison, Well No. 1, which is still in use, has a capacity of only 300 gallons a minute.

Penn Thayer, president of the Mutual Water Improvement District, said a 7500 gallon pressure tank and a 100 horse power booster pump to augment Well No. 2 have been installed.

Gordon Goeres of Silver Lake drilled the new Well No. 2.

## WELL DRILLING PUMPS — PUMP SERVICE

**GORDON GOERES**  
Silver Lake, Oregon  
Phone: 576-2181

## UNDERGROUND WATER SUPPLY HERE EXCELLENT

The underground water conditions at Christmas Valley are excellent.

The present static level of wells in the area varies from 22 ft. to 30 ft.

Present relatively shallow wells in the area produce over 3500 gallons per minute. Many have been drilled in the past year to add to the number previously operating. Some of the wells pumping 3500 gallons a minute do so from a depth of only 135 ft.

The U.S. Department of Agriculture, Soil Conservation Service, reported the water supply outlook for Lake County has continued to improve.

Better than average stream-flow, increased snow cover last winter, improved watershed soil moisture and greater water content of snow courses — which was almost double that of last year — are all favorable factors in this area's water supply outlook.

## Developing Vast Water System Here Cost Company More Than \$250,000

"We have developed our water system in Christmas Valley at an expenditure in excess of \$250,000," revealed President Carlo P. Giuntini.

"We're still developing new wells, installing lines and pressure tank systems to insure an adequate supply of water for the expected increase in population here in Christmas Valley," he said.

## WATER WELL IN VALLEY DRILLED FOR ONLY \$300

Irrefutable proof that water wells can be drilled cheaply at Christmas Valley was forwarded in a letter to the State of California Division of Real Estate by the M. Penn Phillips Co.

A well for domestic purposes was drilled at a total cost of only \$300. The depth of the well was just 70 feet. It has a capacity of 20 gallons a minute.

Here is the well data forwarded to the Division of Real Estate office in Los Angeles:

**SIZE OF WELL** — 6 inches.

**DEPTH OF WELL** — 70 feet.

**STATIC WATER LEVEL** — 22 feet.

**CASING** — 35 feet of 6" casing.

**CAPACITY** — 20 gallons per minute.

The report went on to say that the M. Penn Phillips Co. intends to equip this well with a pump and pressure tank system. This pressure system is designed to deliver 620 gallons per hour, which will be more than sufficient for domestic use. This pressure system delivers from 30 to

"We have already installed more than SIX MILES of pipe (32,855 feet) and have about another 5,780 feet to be put into the ground to service the residents in our Christmas Valley town-site.

"There also has been installed approximately 5000 feet of 2-inch temporary pipe."

Leslie Shaw, writing in the LAKE COUNTY EXAMINER, said Syd Munnerlyn had a well for the Model Farm down to a depth of 165 feet.

### Produce Many Gallons

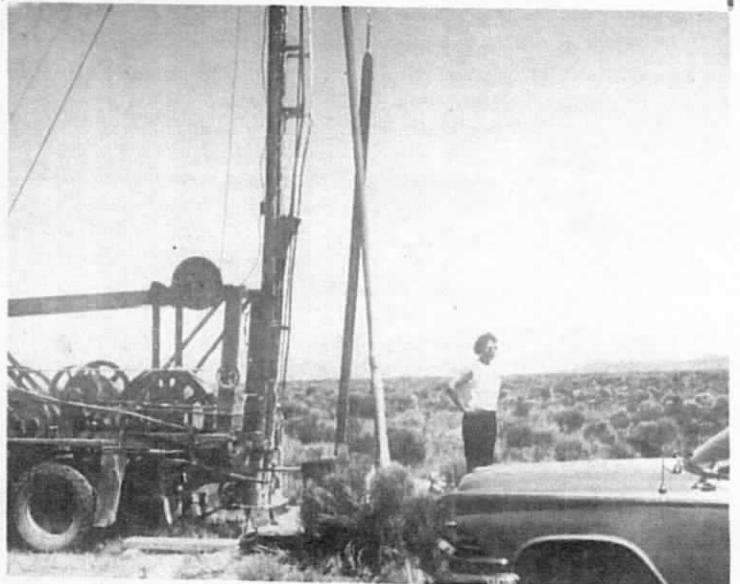

Phil Pitman, who owns 1000 acres adjacent to the Model Farm tract, said that Munnerlyn brought in a well on his acres at a depth of 260 feet, which produced 2500 gallons of water per minute.

This area is about a mile or two from the Century Ranch, established by Pitman a few years ago. One of the irrigation wells there was rated at 3600 gallons of water per minute.

50 pounds pressure with an automatic pressure switch.

The cost of the Mark II pump is \$112.50. Cost of the jet is \$17 and galvanized pipe \$15, making the total cost just \$444.50.

## First Drilling For Water

**FIRST DRILLING FOR WATER AND THE SUCCESSFUL RESULT**—Two photos show the jackpot drillers hit when they attempted their initial well in Christmas Valley. Water conditions underlying this section are excellent. The present static level of wells in the area varies from 22 ft. to 30 ft. Harold Boyer checks flow of water.

## Great Beauty of Christmas Valley Inspires Property Owner to Poetry

Property Owner Jack L. Savage of San Jose, Calif., was so enraptured with his views of Christmas Valley he couldn't contain himself.

Jack had to sit right down and compose this poem, which he entitled, "The Christmas Valley Land."

There must be others among our Property Owners who have a talent for poetry. If you feel so inclined why not send us your poem about Christmas Valley or any particular phase of Christmas Valley like the Model Farm, Golf Course, the Christmas Valley Lodge, the Dude Ranch, the Christmas Valley Lake or the scenic views which abound around Christmas Valley.

Just send your inspirations to our Poetry Editor, Christmas Valley Gazette, P. O. Box 888, Azusa, Calif. We'll try to print the best poem we receive every month.

### THE CHRISTMAS VALLEY LAND

By Jack L. Savage

There's a beautiful spot in Oregon,  
A valley long and wide,  
Which once was just a big, deep lake  
That stopped the lava slide;  
But now the silty, loamy soil  
Calls out to every soul:  
Come, settle here, and own your land,  
It's here you'll find your goal.

But where, you ask in anxious tones,  
Can this great valley be?  
It's off the Cascades to the East  
And miles from off the sea;  
It's Christmas Valley, don't you know?  
The place where people go  
To leave the freeways far behind  
Where traffic crawls so slow.

In Christmas Valley you can see  
The land God leveled out,  
Where men came years ago to farm  
With hearts and wives so stout;  
Heart-back-breaking, tho' their task,  
They stuck 'til it was done,  
Built their homes in Christmas Valley,  
Fought the cowmen with the gun.

But times are often known to change  
And so it was out here;  
World war came for men to fight  
To hold those things so dear;  
To cattle kings the time had come  
To make the farmer go;  
So out they shoved the farming man  
By bribe and gun and blow.

This valley languished fifty years  
While cattle roamed here bounds.  
Most people gone, a memory now,  
Few were the joyous sounds;  
But in old nineteen sixty-two  
The people came again,  
The sounds of laughter now abound,  
Cow-king has lost his reign..

Not all were beaten by the kings,  
Some stayed and fought it out.  
They kept their lands, and to this day  
Their kids are still about;  
These folks who made the Valley home  
Are upright, strong and true,  
They're folks who shun the city life,  
Just like I, and you.

So Christmas Valley is the place  
For those who live to love,  
For those who love to live and breathe  
And honor God above;  
'Twas God who leveled out the dirt  
And made it fit for man,  
So come with me, we'll rush to be  
In the Christmas Valley land.

## What Our Visitors Say About Christmas Valley

LILIAN SARACINO AND EMILY TRUE, San Francisco — "It's remarkable. I'm very pleased with our lot."

MR. AND MRS. FRED CAERNI, San Francisco—"We noticed a lot of progress has been made. We are really satisfied."

MR. AND MRS. FLOYD PETERS, Los Angeles—"Mr. Brown showed me the place and explained everything. It was very nice. I think the place is swell and think it will become a real nice town some day."

DAVID N. VERRETTE, Alameda, Calif.—"I am well satisfied with the property and its prospects. Mr. Atchison personally showed me the property and development of Christmas Valley. I'm pleased with the entire project."

STEPHEN AND MARIE HENDRICKSON, Long Beach — "In my opinion the property has definite possibilities. The development was just about like I was told it would be. It probably was a little better developed than I had imagined."

CLYDE E. COULL — "A lot of work done for such a short time here. Property looks good with reasonable potential. Another year should show good gain in the area. I should be up here about that time."

MR. AND MRS. A. F. GRAY, Gardena, Calif.—"We have looked our property over and think it is great."

MR. AND MRS. WILLIAM GEROLD, Edwards, Calif.—Land is of a very good texture. Development is far ahead of what we expected. Development is of very good planning and scheduling."

## Phillips Company Paves Way

(Continued from Page 3)

grown to its present size. Develoers prepared California land and paved the way for the progress which followed.

Have you ever thought why a town grows in a given spot?

Someone builds it.  
Someone provides the water, roads, electricity and telephone service necessary to make the land usable.

This is the function of our company. We are land developers and have been for 40 years.

Our company has developed more than 500,000 acres of successful developments in places like Vista, Clear Lake, Azusa, Baldwin Park, Hesperia, Salton Sea, Las Vegas, Los Angeles, Antelope Valley, Lake Arrowhead and others.

Our company — with its vast experience — has planned for Christmas Valley a recreational and service center second to none in a state that is famous for its recreational resources.

## FINEST SKIING FACILITIES IN THIS AREA

Assuming your wife doesn't care about hunting or fishing, and please remember we said assuming, she needn't be without recreational entertainment around Christmas Valley, particularly if she is a skier.

Some of the best skiing in the nation is located only a short distance away from our wonderful Christmas Valley.

Expert figure skiers can have the time of their lives in the neighboring mountains for about 17 weeks of the year, which is pretty good.

### Best Ski Facilities

The famous Mt. Bachelor at Bend and the Warner Valley ski area at Lakeview provide some of the best facilities for ski enthusiasts.

Many rate the ski runs of Mt. Bachelor and Warner Valley as being comparable with the best for supplying thrills.

### Air Strip Available

Getting to this area is no problem. Remember we have a first class Christmas Valley Air Park, where even multiple-engine aircraft can easily be accommodated on the 5000 ft. strip.

It's plenty roomy, too. Last summer a total of 17 planes flew here one day for a Fly-In Breakfast.

And if you like to fish and hunt and ski, you've got it made here in our Christmas Valley.
