March, 1963

\$300,000 Pipe Contract Awarded for Townsite Water System Work

Spring is here
Why not gas up and take a trip to Oregon while there is still room on the highways? It is estimated that the California population is increasing at the rate of 1700 a day. Picture what it will be in 1980.
Picture our state now; Add for every 17 autos, 14 more; for every 17 trucks, 14 more; for every 17 busses, 14 more; for every 17 parking lots, add 14 more, and for every 17 miles of existing streets, roads, highways, "freeways," add 14 miles.
You can still find room in Oregon Smog free air good fishing and hunting. Make your plans now before all of those people get here.

Rest of \$10,000 Golf Equipment Now Purchased

The remainder of golf course equipment, worth nearly \$10,000 has been purchased and will be delivered about April 15, president Carlo Giuntini reported.

Early this month, \$3641 worth of equipment was purchased. Included were a tractor with loader and blades, shop equipment and tools, ball washers, flags, cup setter, hole cutter, cup extractor, trap rakes, cups, putting green markers and other necessary items.

President Giuntini, an avid and capable golfer, obviously wants to get playing on the sporty golf course he designed personally.

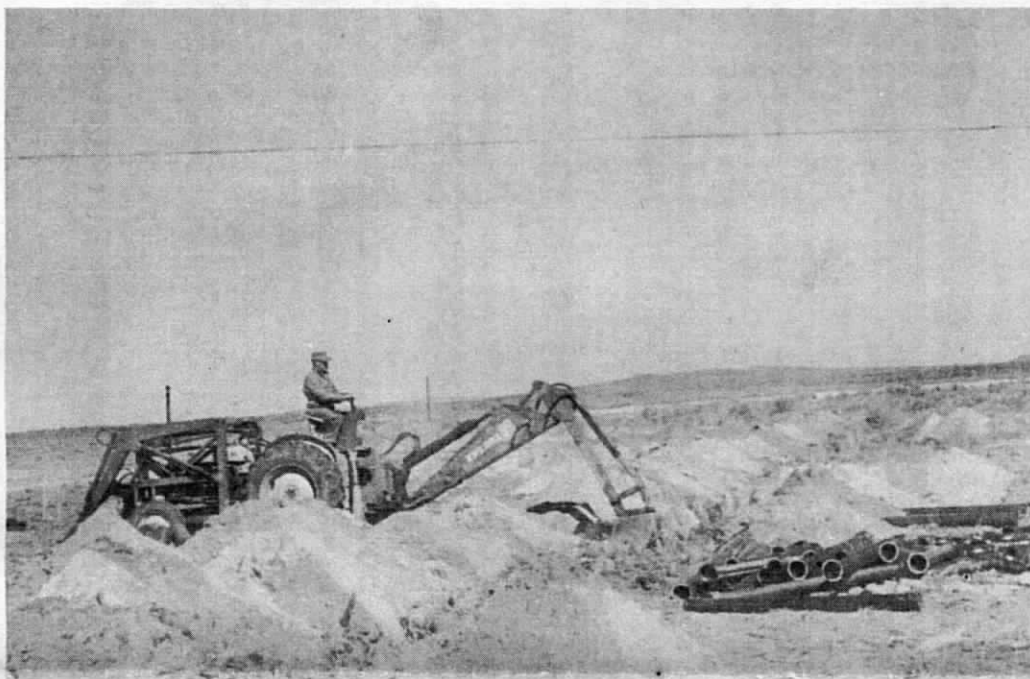

Ahead Of Schedule

Purchased ahead of schedule was \$5,600 worth of machinery, including five gang mowers, valued at \$2000, two green mowers, an aerifier, a verticutter, sprayer, benches, signs and drinking water fountains. These originally were to be delivered about June 1.

"Only the best equipment and finest facilities will be available to Christmas Valley golfers and their friends," promised Giuntini.

Christmas Valley peace officer Mel Brown got himself a deputy, except that the deputy won't be able to report for duty for about 21 years.

Deputy Sheriff Brown last week became the grandfather of Mathew William who weighed in at 6 lbs. 7 oz.

WATER LINE WORK CONTINUES--Workman is shown digging ditches for installation of pipe lines in Christmas Valley. Activity will be speeded up with the awarding of a \$300,000 contract to complete the water system program in the townsite. Officials estimate 168,400 lineal feet of different sized pipelines will be installed.

Warren Morton Elected Chairman of New Christmas Valley Recreation District

Warren Morton, project manager of Christmas Valley has been elected chairman of the Christmas Valley Recreation District at the group's first meeting at the Christmas Valley Lodge on Feb. 21.

Charles Selby was elected secretary. John Pettus is the third member of the board of directors.

The Christmas Valley Recreation District, which was formed Jan. 11 by the unani-

mous vote of local residents, is the official operating body within this area. It can set up the budget for the year, institute various planning operations and programs to provide leadership for the growth and development of Christmas Valley.

The directors of the CVRD voted to hold meetings on the second and fourth Thursdays of each month.

Morton contacted the Gor-

don Randall Insurance Agency to provide bond coverage for the directors.

The directors will consider operation of a playground, lodge grounds, Christmas Valley Lake, Christmas Valley Air Park and golf course.

Stocking the Lake with suitable fish was discussed by the directors, and Selby was to investigate further the best program for obtaining and stocking the fish.

168,400 Ft. of Pipeline to be Installed Here

Fred Gilmore, president of the Sterling Pipe Company, has been awarded the contract to supply labor and materials necessary to complete the water system in the Christmas Valley townsite, President Carlo P. Giuntini announced.

Gilmore plans to begin trucking materials to Christmas Valley approximately April 15.

The overall contract calls for the installation of some 168,400 lineal feet of four, six and eight inch pipe, 170 valves, 180 firehydrants, and various special fittings.

The water lines will be placed in the road right of ways and will be installed according to specifications prepared by the water company in accordance with the Oregon State health department.

The contract was awarded to Gilmore for over \$300,000.00. He said that the entire job should be completed in some 18 months, weather and labor conditions permitting.

Another Water Well

The installation and equipping of the balance of the wells planned for the water distribution system will proceed concurrently with the pipe installation.

Gordon Goeres, local well driller, has been selected to complete this phase of the work. The next well to be drilled will be on Lot 26, Block 3, Unit 1 and will be powered by a gasoline driven engine. This particular well will be used for a standby water source if a power failure should ever occur.

More Employment

Warren Morton, project manager, has worked with Fred Gilmore on several other

Continued on Page 2

OREGON'S GENERAL FISHING SEASON FOR TROUT RUNS APRIL 20 TO OCT. 31

Christmas Valley Property Owners and their friends soon can enjoy themselves at some of the best trout fishing spots in the country only a few miles from Christmas Valley.

The general trout season in Oregon opens April 20 and ends October 31 in all areas except Zone 1 (Coos River, Fall Creek, Garrison Lake, Klaskamine River, Saunders Lake and Siletz River), Zone 3 (Loon and Diamond Lakes and Umpqua River) and Zone 4 (Emigrant Reservoir, Rogue River and Selmac Lake).

The streams in Zone 1, the coastal area and the Cascade Lakes, reservoirs and their tributaries have a general open season from May 25 through October 31.

The editors of the Christmas Valley Gazette have spotted some of the best fishing holes in Oregon and have reprinted this information on the big map on pages 4 and 5.

It is suggested that fishermen save this map for referral purposes when fishing and hunting editor LeRoy Harrod writes his interesting and informative articles on angling in coming editions.

Fishermen are reminded that Ana and Friday Reservoirs are open to fishing the entire year.

Watch for subsequent stories by fishing expert Harrod, who knows this area and all the best fishing holes like the back of his hand. LeRoy has

bagged many a creel full of fighting trout as proof of his fishing knowledge.

CHRISTMAS VALLEY CLUB IN SAUGUS EXPANDS-- Membership in the club has nearly doubled since the printing of the picture and story in the last issue of the Gazette. Club has expanded from six to 10 members. The Russ Cherrys of Sun Valley, Calif., and Francis Tillotsons of Van Nuys are the newest members. They held a meeting at the Saugus home of Mr. and Mrs. Ralph Kain. All seem happy with progress of Christmas Valley.

MEMBERSHIP IN CV SAUGUS CLUB NEARLY DOUBLED NOW

Word on Christmas Valley sure gets around in a hurry.

In the last issue of the Gazette, a story was printed that Christmas Valley Property Owners living in Saugus, Calif. had formed a club to discuss future home building plans at Christmas Valley.

The founder of the Saugus branch, Russ Lansdowne, herewith reports that the

club's membership has nearly doubled since the story.

Lansdowne, in a letter to Phil Washington on March 24, said:

"Due to the writeups in the Gazette, the Christmas Valley Club in Saugus is growing by leaps and bounds.

"At the last meeting, we added four new members to our Club. They are Mr. and Mrs. Russ Cherry of Sun Valley and the Francis Tillotsons of Van Nuys.

"The meeting was held last Friday, March 22, at the home of Mr. and Mrs. Ralph Kain of Saugus. Those attending were the Cherrys, Tillotsons, Russ Lansdowne and Mr. and Mrs. George Schuitz of Saugus.

"Of interest to all were the plans the Cherrys have had drawn up of the 'All Western' Bar and Dance Hall. Being square dance fans themselves, they plan to hold square dances at the establishment.

"A delightful lunch was served by Mrs. Kain, and everyone had a good time as illustrated by the above picture."

The Gazette editors are interested in hearing from other Christmas Valley Property Owners who have formed clubs in their home towns. Pictures are welcomed.

1120 Acres of Raw Land Developed by Pettus for Residents in 1962

The John Pettus Company, specialists in contracting farming, well drilling and pump and irrigation systems, has been very active in developing land in Christmas Valley.

Pettus takes the ground from the raw state and clears, plows, disk's and seeds it whatever crop the client wishes. All the work is being ac-

complished on a per acre basis.

Developed 1120 Acres

In the 1962 season John developed over 1120 acres for various clients. The work for 18 different people involved everything from drilling irrigation wells to fencing and the actual seeding. The parcel sizes ranged from 20 acres to a half section of 320 acres.

The Pettuses have been residents of Christmas Valley for a number of years and were one of the first to purchase a home in the dude ranch area of the new Christmas Valley Townsite.

Expects Big Year

The unique service the John Pettus Company offers has proven valuable to absentee homeowners and people who wish their acreage developed before actually moving to the Valley.

John feels that the 1963 season will be even better than last year because of the large number of people who have contacted him to develop their acreage.

Ron Markus Wins Debating Contest

Ron Markus of Silver Lake School won the annual speaking contest with his topic of "Woodland Conservation." Ron, whose name will be engraved on a traveling plaque, is the son of Mr. and Mrs. Henry Marcus. He is an eighth grader.

Runner-up was Judy Irwin, a fifth grader at Fort Rock School.

Douglas Clark and Joy Ashcraft of Summer Lake's Ana River School, Sandra Dutcher, Fort Rock School, and Kelly Corum, Silver Lake School, were other contestants.

Each was awarded a merchandise gift certificate from a Bend or Lakeview firm. In addition, the Lake County Chamber of Commerce will sponsor an air trip for them to Klamath Falls and return to Lakeview.

ANOTHER 100 TREES PLANTED ON COURSE

Another 100 trees have been planted in strategic spots around the Christmas Valley Golf Course. This brings the total of trees planted to more than 500.

Project manager Warren Morton said most of the trees

are native to this area, including pines, poplars, elms, silver maples and cottonwoods.

Morton said a nursery has been set up to supply additional trees for future planting in Christmas Valley.

Don Adams

Christmas Valley Sales Activity at Record Pace

Don Adams, genial sales manager for the M. Penn Phillips Company, reports excellent sales activity for the Christmas Valley group during the last few months.

Don's force is spread from San Diego to San Francisco, and they keep him on the go holding weekly sales meetings in San Francisco, San Diego, San Jose and the main office in Azusa.

The main impetus seems to be on townsite lots, particularly the "Own-Your-Own" trailer lots. These have received a terrific response from clients.

Demand For Property

The lots provide clients who own mobile homes the opportunity to own a trailer lot, have access to the fine new recreation building now under construction and be within easy driving distance to some of the most beautiful scenery and prolific fishing and hunting areas in the entire country.

"The record pace at which the Christmas Valley development has been selling proves there is a great demand for this type of property and that many people have become interested in the opportunities offered by the fine state of Oregon", Adams said.

Don is an advocate of the professional approach to Real Estate salesmanship and is currently upgrading the sales team in its work effort as well as client relationship both before and after the sale.

He said the major portion of sales has been centered in the townsite area due to the amount of activity around the Christmas Valley Golf Course, lake and commercial center.

JUST LIKE THE BIG LEAGUES--Men, women and kids, all volunteers, are shown working on backstop for Christmas Valley baseball diamond. Local merchants have donated time and material toward building this community project. The baseball diamond is one of the first ventures of the newly created Christmas Valley Recreation District. Diamond is rapidly nearing completion.

Oregon's Black-Tailed Deer Just as Wary as Their Eastern Cousins

Not long ago an experiment in Michigan was tried to illustrate the difficulty of hunters in bagging whitetailed deer even under the best of hunting conditions.

The experiment here included placing 39 white-tailed deer, including 7 bucks into a fenced square-mile deerproof enclosure. The area fenced was located in typical Michigan deer country. And the number of deer is a pretty good population for such a small area.

Six experienced hunters were sent into the area to hunt under ideal weather and snow conditions. The six hunters worked hard, yet it took four hunting days before one of the hunters even saw a buck, and it took almost four and a half days to bag one.

Oregon Deer Wary

There is no doubt that Oregon black-tailed deer are just as wary as their eastern white-tailed cousins, especially when the brush and timberlands of western Oregon are in full leaf. At that time, hunters can practically walk over skulking black-tails without even knowing their presence.

The wariness of the black-tailed deer in heavy cover was revealed last fall by the research division of the game

commission during a careful study on Edwards Creek, an area along the Trask River in Tillamook county.

The area was open to deer hunters during the general hunting season last fall and again for a two-day controlled hunt November 17 and 18 for 400 controlled season tag holders.

Foiled Hunters

Let's take a look at how black-tailed deer foiled deer hunters during the general season, and then what occurred during the late season controlled hunt.

The Edwards Creek controlled hunting area was checked closely by research biologists during the general hunting season when vegetation was in full leaf, and again during the two-day November hunt when vine maple, alder and other vegetation had shed its summer raiment.

According to the research division, a total of 1,218 deer hunters worked the Edwards Creek drainage within the controlled area boundaries during the general deer season last fall.

These hunters killed 96 black-tailed deer for a hunter success of only 7.9 percent. The hunters took 2.7 buck deer per section of land and only 4.7 deer of either sex per section of land. Many hunters were of the opinion there were very few deer in the Edwards Creek area.

During the two-day November season, a total of 399 hunters were checked at Edwards Creek. These hunters reported out with 246 black-tailed deer, or a total of 12 deer per section of land.

On November 17, the first day of the hunt, 270 hunters took 174 black-tails for a success of 64 percent. The following day 129 controlled tag holders hunted the area and

MOREHOUSE, CARLON REELECTED TO BOARD

Richard Morehouse of Fort Rock and George Carlon of Silver Lake were re-elected to serve on the board of supervisors of the Fort Rock-Silver Lake Soil Conservation District.

The SCD members held their annual meeting at the Christmas Valley Lodge.

came away with 72 deer for a hunter success of 56 percent.

As mentioned the Edwards Creek area was in full autumn leaf during the general season and the cagey black-tails had abundant and dense cover in which to play hide and seek with their adversary.

In late November, during the controlled hunt, maples, alder and other vegetation had shed much of its summer foliage and the jungles of bracken fern had died down. Dense cover opened up leaving black-tailed deer much more visible to the hunter.

Work on Valley's Baseball Diamond Nearly Completed

"At the rate we're going we may have the Christmas Valley baseball diamond finished to coincide with the opening of the major league baseball season in April," said John Pettus.

Pettus, a director of the Christmas Valley Recreation District, said work is progressing very nicely.

"You have to be impressed with the work being done, especially when you consider that all the work is voluntary with even kids and women pitching in," said Pettus.

Community Effort

Pettus, Virgil Hall and Al Baert donated the land preparation. Penn Phillips Lands Inc. donated the seed. Joe Ward donated his time for seeding supervision and Joe Murphy for ground layout.

Don Clause donated the lumber and welders donated their time to install water lines. Vince Genna furnished information for the actual organization of the field and Pettus also organized plans for building the backstop and parking area.

Located On School Site

The diamond will be located on the school site, which is located south and east of the Townsite.

Kids got off to a good start as far as obtaining equipment was concerned. The Recreation District received \$70 in donations at a potluck dinner at the Lodge.

Goeres Visit Washington

Mr. and Mrs. Gordon Goeres and children spent a week in Washington visiting friends and relatives.

Goeres has done considerable well drilling work in Christmas Valley.

Holmquist Named Regional Manager for San Francisco

General sales manager Don Adams reports that the company's top salesman, J. D. (Pete) Holmquist, has been appointed Regional Sales Manager for the San Francisco and Bay Area.

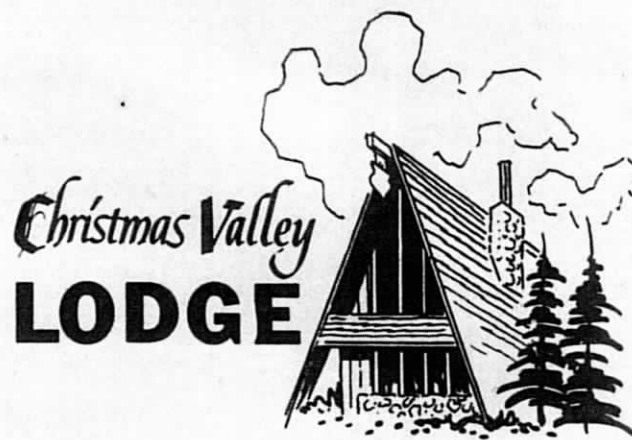

Holmquist's spacious offices will be located at 4444 Geary Street, San Francisco. His telephone numbers are SKYline 2-9414, 2-9415.

Pete recently completed an extensive trip to Christmas Valley and has compiled a sizable library of pictures and information.

Land Management Consultant

He is completing an interesting display of pictures and information of the most recent progress at Christmas Valley. This display is available for free inspection, and Pete asks that all his friends and customers drop by to say hello.

Adams said Holmquist is available for consultation in management of properties as well as for consultation in farm management and practices.

Watsonville Shop Owners Moving Here

Floyd and Catherine Olander have recently arrived in Christmas Valley to stay. The Olanders were previously from Watsonville, California, and are located in the temporary trailer park until the new mobile home quarters are ready for occupancy.

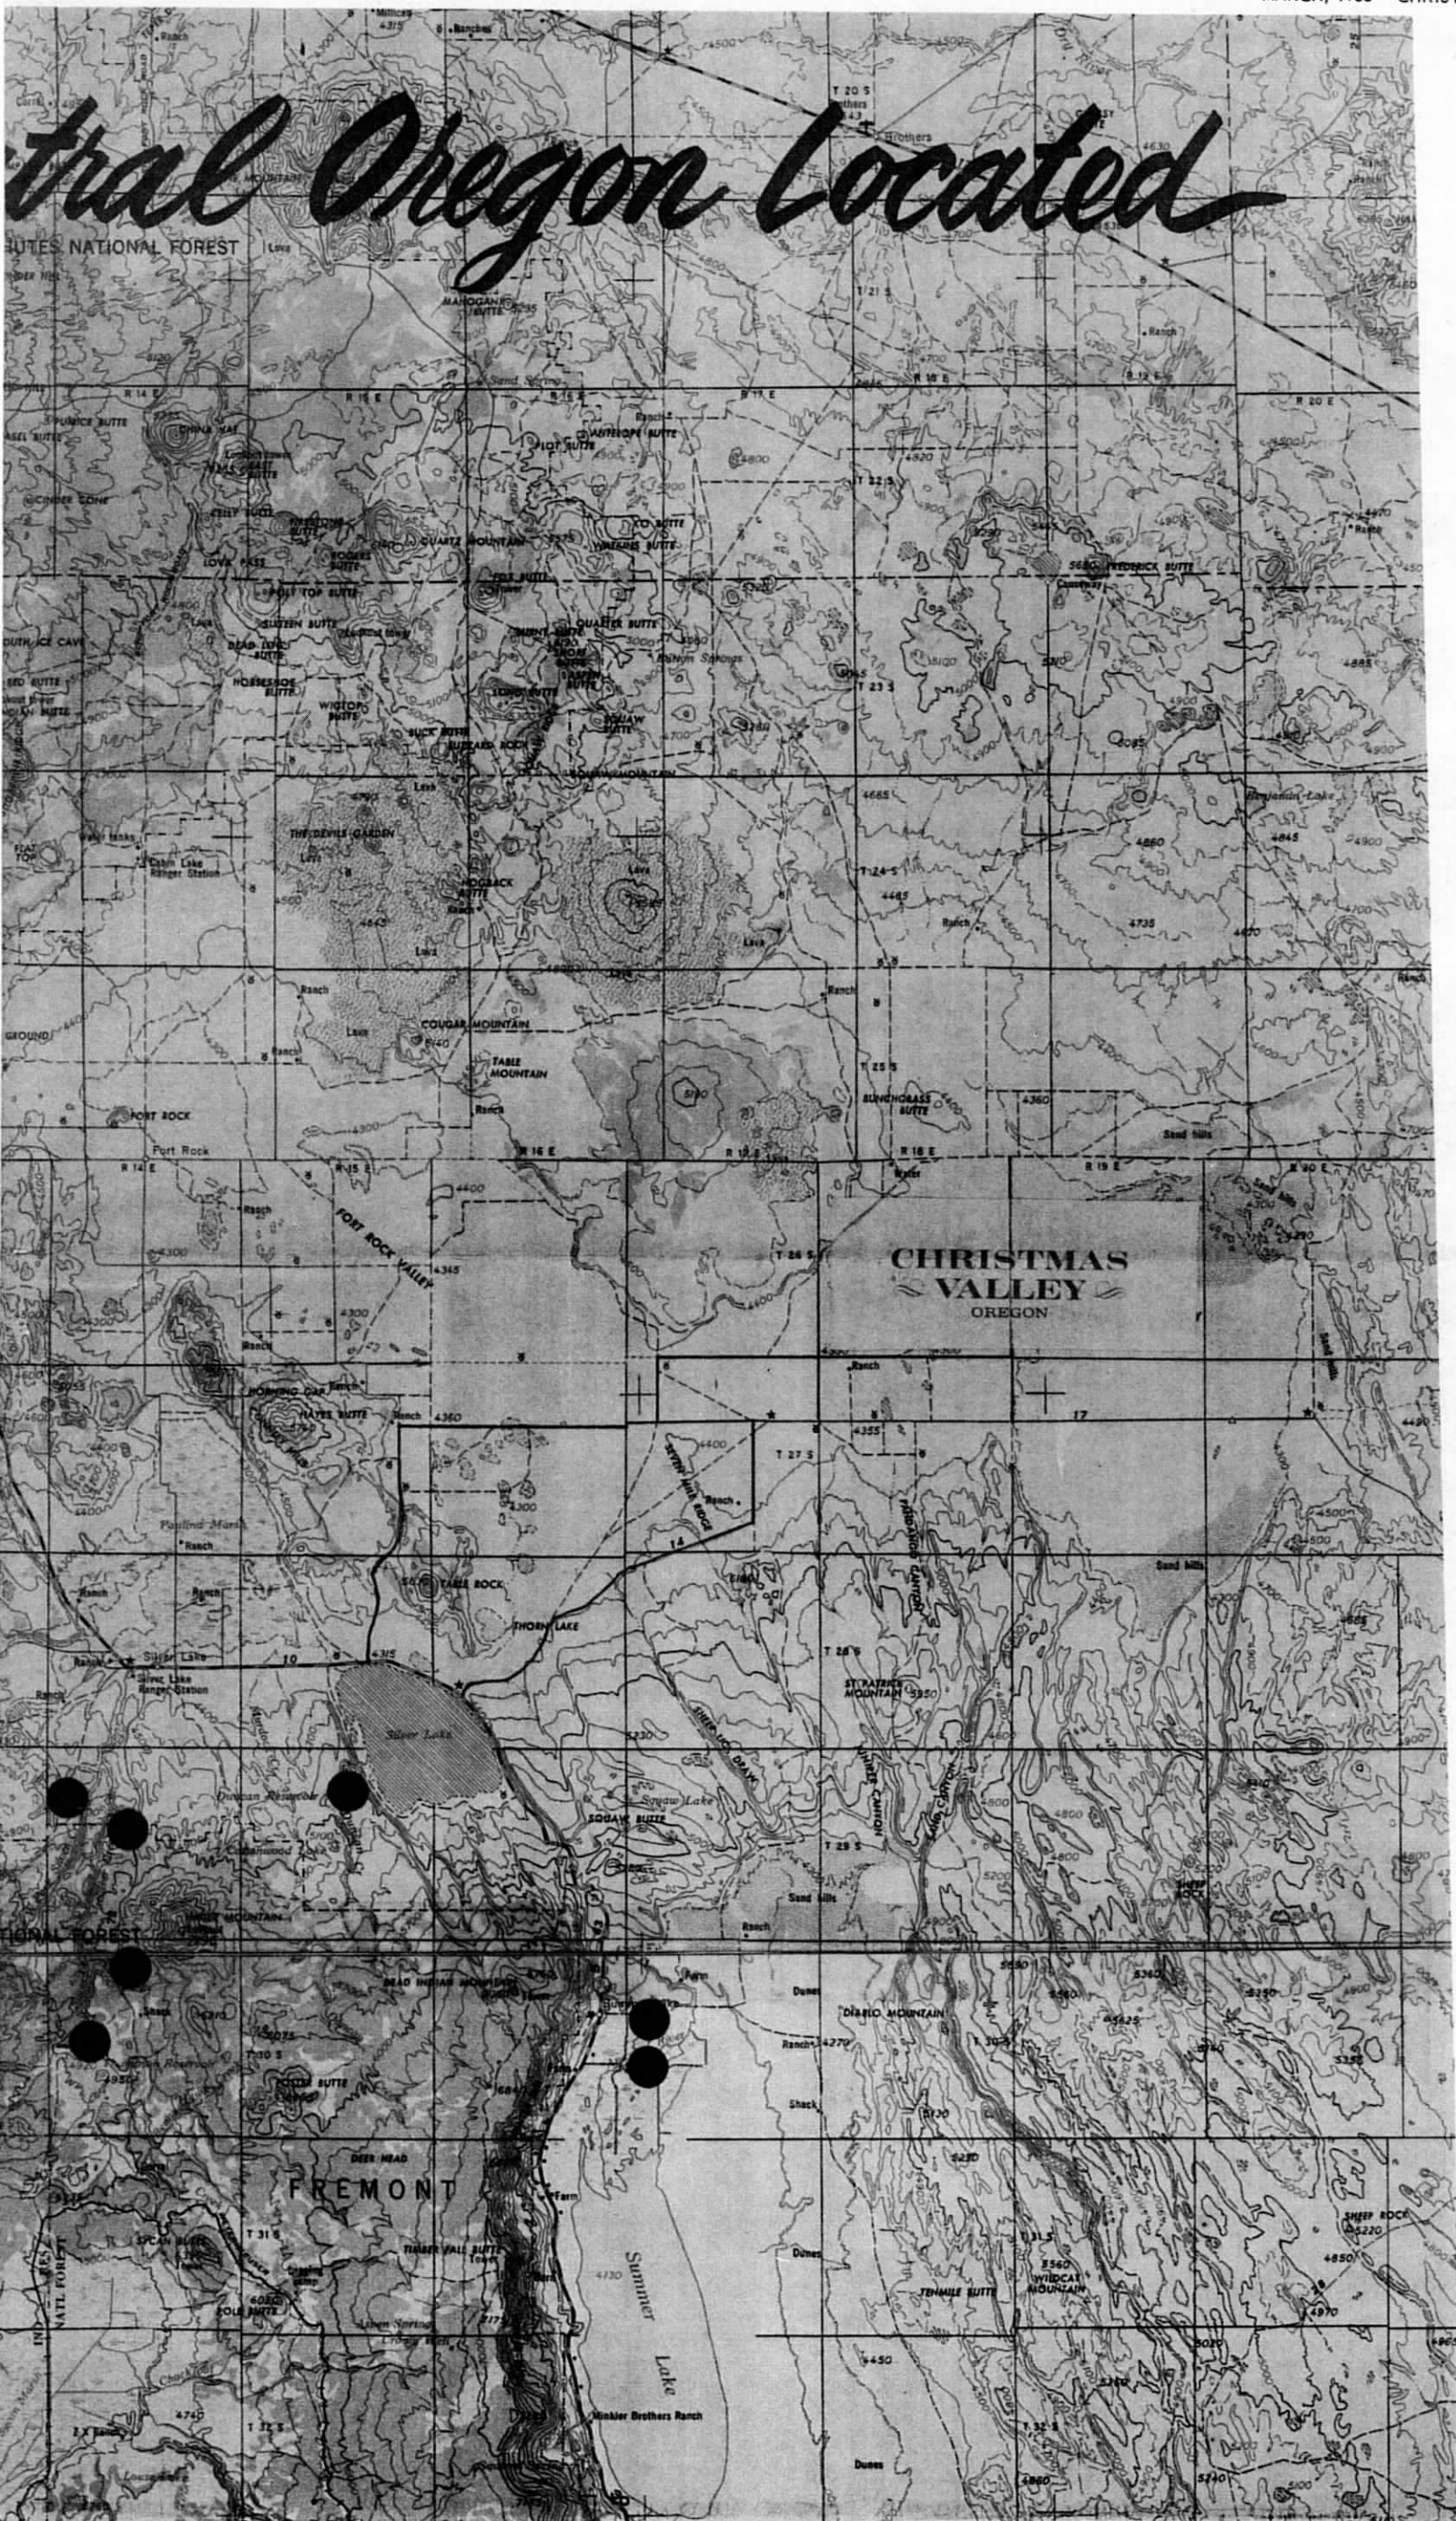

They operated a children's ready-to-wear store in Watsonville before coming to Christmas Valley.

The Olanders are owners of commercial property and are looking for a business opportunity in the townsite.

Both Floyd and Catherine are avid golfers and are eagerly awaiting the completion of the new course.

Central Oregon Located

BEST WAY TO LAY OUT FIELD FOR PLOWING

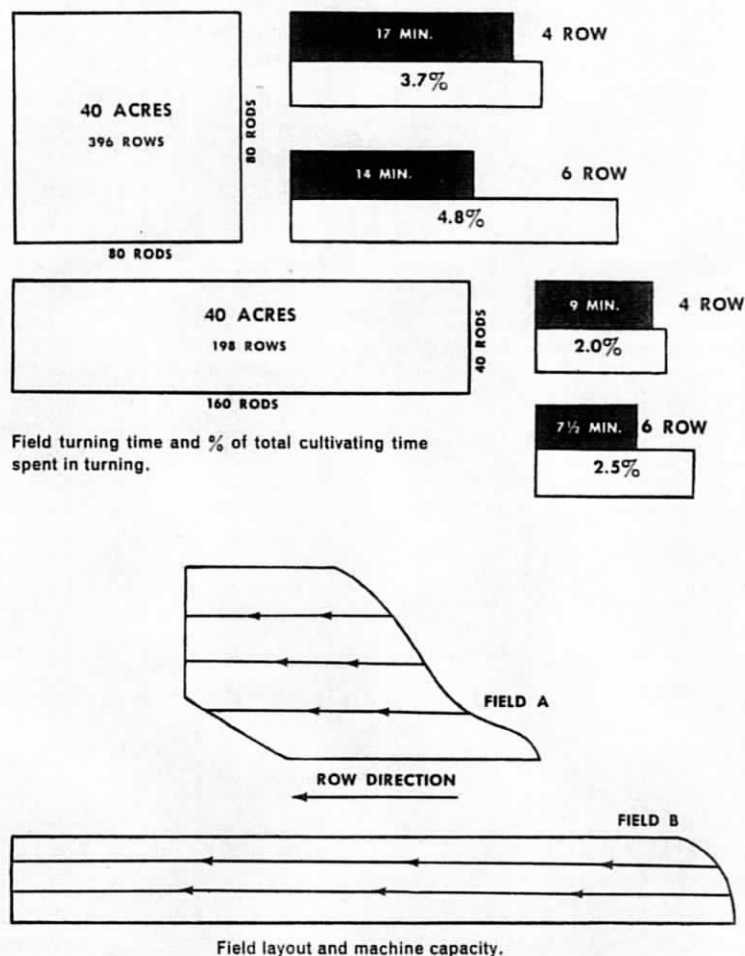

Frequent turning can be a real drawback in fieldwork, especially if you have to do it often—as is usually the case in poorly drained areas.

To better understand how field shape affects lost time in turning, let's look at two 40-acre fields (chart at right). Assume that turning a four-row cultivator will take 10 seconds; 12 seconds will be needed for a six-row outfit. Exclusive of turning time, both fields will require the same time to cover. Total cultivating time would be 5.8 and 8.7 acres per hour for the four and six-row outfits respectively. Notice how the larger cultivator spends a greater proportion of its time in the turns and how much larger percentage of time is required for turning on the shorter rows. With eight-row and larger equipment, this factor becomes even more important.

In areas where fields are highly irregular due to drainage problems, differences in machinery efficiency can be even greater. In one study, Field A, with row lengths of 165 to 400 feet, and Field B, with 1,000-foot rows, were compared with the same operation, machine and driver. In Field A the two-row cultivator had a capacity of 1.9 acres per hour while in Field B 2.9 acres per hour were covered. This is a full acre per hour in favor of the longer rows. Consider the possibility of combining several smaller fields by an improved surface drainage layout that eliminates field-dividing ditches.

Good field layout plus holding down time loss due to field adjustments and repairs, adding seed, fertilizer, chemicals, and water mean you can handle more acres with a given size implement... at lower cost per acre for each operation.

Illustration and data from DOANES Magazine

Officials Attempt to Re-Establish Sharptail Grouse

Sharptail grouse is another species the Oregon Game Commission is attempting to re-establish here.

The sharptail is about the size of a hen pheasant and is mottled gray and brown in color with a white breast having V-shaped markings. The bird is heavy bodied and has a long neck, a slight crest on its head and a sharp pointed tail.

A release of 46 sharptails was made in February in the National Grasslands Area. The birds were furnished by the South Dakota Department of Game, Fish and Parks in exchange for 100 valley quail previously shipped to that department.

Once Abundant

The liberation site chosen is similar to the South Dakota habitat of the grouse.

In the grassland and short sage areas of eastern Oregon, sharptail grouse were once abundant but gradually disappeared as agriculture took over. A few birds remain in some areas in the northeastern section of the state.

A second release of 39 birds was made later in the area south of Maupin.

Silver Lake Students Work for Field Trip

Students in the upper grade room of the Silver Lake School are busy with several money-making projects to obtain funds for a field trip to Portland in May.

Last weekend the kids were knocking on doors, selling ballpoint pens, one of their projects. The student selling the most pens will receive a prize.

They also plan a movie benefit in the near future to help pay their way to visit the museum and zoo in Portland.

GREW 'EM BIG HERE--No, these turnips and radishes aren't magnified. These were actually grown at the Pinter Ranch way back in 1925. The turnip weighed 19 pounds and the radishes 16 and 9 pounds. Cal Woods won blue ribbons with these giant vegetables at the Oregon State Fair in Salem in 1925.

Methods of Removing Alkali

1. By leaching - leveling the ground, confining the surface in basins, flooding the basins so that the salts are dissolved, draining off the resulting salty water, and repeating the entire process many times.
2. By drainage - constructing drainage ditches with bottoms well below the ground surface, irrigating the soil by flooding or sprinkling - usually requires sub-soiling and leaching and occasionally requires placing of cross drain tile - used in conjunction with leaching and sub-soiling.
3. By sub-soiling - also known as deep plowing, chiseling or breaking up of the hardpan layer always present a short distance (four to twelve inches) below the surface.
4. By planting alkali-resistant crops - planting of certain crops, notably, sugar beets, mangelwurtzers, sweet clovers, tall wheatgrass, to name a few, which are not only alkali-resistant, but which thrive on sweet soils, for a few years until the alkali has been used up - such crops extend their roots through the hardpan layer and break it up so that normal irrigation waters thereafter drain through the soil.
5. By chemical treatment - by adding gypsum and sulfur, usually, or other chemicals, in sufficient amounts to chemically balance the alkali.

PORK RAISING COULD BE PROFITABLE VENTURE HERE IN CHRISTMAS VALLEY

Pork Production while not the most glamorous form of agriculture could become one of the most lucrative agricultural pursuits of the Christmas Valley area.

Of the pork consumed on the Pacific Coast, 85% is raised elsewhere. Thus providing a ready market for animals raised locally.

The Ralston-Purina Company, which has done considerable research regarding the rearing and feeding of hogs, has literature available on various methods and techniques for raising hogs.

The initial farrowinghouse, as designed by Ralston-Purina Company, utilizes 2500 feet of square land and would accommodate 15 brood sows. One acre of land could accommodate 400 sows and with proper management and marketing could produce a very comfortable income.

Tremendous Strides Made

Tremendous strides have been made in recent years toward more efficient pork productions and reduction of

odors that are associated with hog raising.

We have been attempting to accumulate as much information as possible concerning various agricultural pursuits that would be practical in Christmas Valley.

Property owners interested in this particular phase of agriculture can get further information and descriptive booklets by writing directly to the editor of the Christmas Valley Gazette.

Oregon Farms Small

According to the 1959 U.S. Census figures 44% of all Oregon farms are under 49 acres in size. The breakdown shows 12% under 10 acres and 32% between 10 and 49 acres.

What Our Visitors Say About Christmas Valley

MR. & MRS. CARL HARTUP, Santa Rosa, Calif.--"The property is as I expected. The soil is good. For the time that this project has been going on, an enormous amount of work has been done."

LEO R. AND EDITH ELIZALDE, San Diego, Calif.--"Very much impressed with 80 acres here in Christmas Valley. The lake is fabulous. The water is the best we have ever tasted. This is truly going to be the greatest, finest city. Country living anyone would want."

EARL HUTCHINSON, Eugene, Ore.--"Second trip. Very happy with both lots."

MR. & MRS. GECK, Santa Clara, Calif.--"From what I have seen of Christmas Valley, I like what I have seen and think it has a good future. Hope to be up here permanently some day."

IRA & MARGARET NEAL, Canoga Park, Calif.--"We have visited Christmas Valley for the first time and are very impressed with what we saw. We feel that when this Valley is more developed it will be a very nice place in which to live. A nice view of the mountains nearly every direction you look."

MRS. MARY E. JOHNSON & FAMILY, Glendora, Calif.--"We like it very much. Hope to make this our home in the next year or two. Wonderful place for children. The people we have met have been so nice that we would like to have them for neighbors."

MERRITT & LOIS KORN, Clovis, Calif.--"Surprised to see roads already going in. Progress seems to be coming along nicely."

ANTHONY & IDA BURGIE, Burbank, Calif.--"I was satisfied with 20 acres I bought. Everyone was very good and made us feel at home. I will be back as soon as possible for a longer stay."

MR. & MRS. THOMAS MOORE, Azusa, Calif.--"Impressed with progress already made. Looks as though it will be a very desirable development."

W. E. NESBITT, Las Vegas, Nevada--"We toured the area, model farm, lodge, etc., and it looks very promising. We were also pleased with the guided tour Mr. Stanfill gave us."

JERRY SMITH, Orcutt, Calif.--"Think Christmas Valley is a remarkable development and is growing at an amazing speed. I have lots of hope for it."

DAVID & ANNETTE THATCHER--"Very good soil. Lots of buffalo grass. Connie Fisher and Mel Brown courteous, patient and good salesmen."

THOMAS DANIELS, Seaside, Calif.--"Very well satisfied with property and area. Hope to build soon."

JERRY & MARGARET EMERY, Artesia, Calif.--"We stayed two days in Christmas Valley. Everyone was very kind, courteous and helpful. The food and service in the Lodge were excellent. Was very impressed with the view and surrounding country."

WALLACE & CHARLOTTE WOOD, Saratoga, Calif.--"An excellent development in a wonderful state. We are happy to be a part of it."

MR. & MRS. R. P. McCREARY, Fresno, Calif.--"Like it real good. Think it's very nice. Really think it has a good future."

FRANK A. NEWQUIST, Santa Monica, Calif.--"I am well satisfied with my lot and like the location very much."

TED & LUCY SCHOTT, Van Nuys, Calif.--"Beautiful country. Personally satisfied with the development."

GEORGE W. ANDRO, San Jose, Calif.--"Considerable progress and building has been completed since February."

CHARLES CASAD, Apple Valley, Calif.--"We enjoyed our tour of Christmas Valley. Everything is progressing and will soon be a thriving community."

WILLIAM & HELEN SKINNER, Mt. View, Calif.--"Well satisfied with progress. Think we made a wise investment."

MR. & MRS. JIM HAGER, Lompoc, Calif.--"Looks like everything is going along pretty smooth. A awful lot has been done since I was here last September. I think any land here, regardless of size, is a good investment."

MR. & MRS. E. J. ALLEN, Long Beach, Calif.--"I think this is a wonderful project. Hope to locate here soon."

MR. & MRS. H. R. LILIAN, Hawthorne, Calif.--"Land seems to be very good. Development of area is coming along fine."

PIONEER MURPHY FAMILY HAS PLENTY OF OUTSIDE INTERESTS

Joe and Dorothy Murphy have been residents of Christmas Valley for almost two years. Their four children, Joe Jr. 12; Patricia, 11; Jenny 3, and Chris 1, can be seen right in the middle of the youth activity.

Chris has the distinction of being the first baby born in the new Christmas Valley townsite. Joe Jr. and Patricia attend school in Fort Rock.

Murphy is in charge of the engineering crews whose job it is to locate various parcels of land and also work with water line design and construction. A native of Glade Water, Texas, Murphy spent eight years in the Army.

He was construction surveyor at the Hungry Horse Dam project in Montana and also worked with the Bureau of Reclamation Survey on the

Clark Ford Dam in Idaho.

Joe was a concrete inspector for the Morrison Knudsen Company, international contractors prior to coming to Christmas Valley.

Guides Survey Team

Joe guides the work of a three-man survey team and prepares the maps and calculations in the main Christmas Valley office.

Dorothy, who has her hands full with the growing family, is a live wire in local affairs. She is one of the spark plugs behind the building of the new softball diamond.

The Murphys' hobbies of arrowhead hunting, fishing, just plain hunting, and camping as a family unit have been keeping them busy. That's because there are many places to visit and explore within a short distance of the center of town.

COMPLETING WORK ON FIREPLACE--Workman puts finishing touches on big fireplace in the new Recreation Hall, which is the social center for occupants of the Mobile Home Estates and the Own-Your-Own Trailer Lot. Building has club meeting rooms, game rooms, a beautiful lounge and even a spot for laundry facilities.

RECREATION BUILDING READY FOR MOBILE HOME RESIDENTS

The social center of the Christmas Valley Mobile Home Estates--an elaborate Recreation Hall--is ready for residents here.

The Recreation Hall is an all-purpose building. It has club meeting rooms, game rooms, a beautiful lounge and even a section for laundry facilities.

Architecture is of heavy post and beam construction, similar to that of the popular Christmas Valley Lodge. A huge fireplace brightens the interior.

The Recreation Hall is but one of the features of the Mobile Home Estates project. Occupants of the luxurious trailer park will have access to docking and beach facilities on Christmas Valley Lake, as well as barbecue pits and outdoor game facilities.

The trailer park's initial construction will consist of 32 completely developed rental spaces.

Each space will have an in-

dividual concrete patio, plus water, electric and sewage hookups. Each space is big enough to accommodate the largest trailers. These individual spaces also have off-street parking for the family car.

The Mobile Homes Estate project is located east of the Own-Your-Own Trailer Park

ROAD WORK ON SCHEDULE IN CHRISTMAS VALLEY

The Lake County court has approved road construction and released improvement bonds on the first seven units of the Christmas Valley townsite. Work is progressing on unit 8 and the balance of the townsite roads will be close to completion this year.

The roads in Christmas Valley fall into two categories; Townsite and Rural roads. The roads with the townsite are graded to a 30' width and properly crowned for good drainage, they are covered with 6" of crushed rock and when completed to county specifications will be accepted and maintained by the county. A bond to insure improvements to county standards has been placed on these subdivisions.

The rural roads are cleared and graded to a 30' width within the road easement and are shaped and crowned to insure good drainage. The construction of rural roads has been progressing very well, with emphasis on building roads to acreage parcels that are to be improved right away.

There are over 200 miles of rural roads constructed and in use at the present time. These roads will be kept up by the adjacent property owners and usually follow section lines. They provide access to every parcel regardless of size.

development and west of the Lodge, between Christmas Valley Road and the Lake.

M. Penn Phillips Is Recipient of Unique Honor

Personable M. Penn Phillips, rightfully called "the modern builder of the West," has received countless honors for his outstanding development work.

Here in Christmas Valley, another of the many successful M. Penn Phillips Co. projects, Phillips received perhaps the most unique honor in his career. His pictures will grace the rooms of the spic-and-span Christmas Valley Motel.

Mr. and Mrs. Fred Thompson, who purchased the Motel from the company, asked Phillips for some pictures of himself to decorate the motel rooms. Phillips obliged.

The Thompsons wrote: "We really wanted to thank you in person for these wonderful pictures of you for our motel. But we realize how busy you are so we will take this opportunity to do so.

"We want to make your pictures a permanent part of our Motel so we decided it would be best to screw the picture frames to the walls.

"Thank you again, Mr. Phillips. It's a real pleasure and honor to place these pictures of you in our motel.

"Come up and see us soon."

Bonds Sold for New Junior College

New science and academic center buildings for Central Oregon College in Bend will be constructed on a 145-acre site on Awbrey Heights, about 1 1/2 miles west of the city center.

Proceeds from the \$125,000 Central Oregon Area Education District general obligation bond issue, together with \$225,000 from the State De-

Three Bowen Brothers Honored as Top Conservation Farmers of Year

The Bowen brothers, Darrel, Dee and Jack, were named conservation farmers of the year for 1961-62.

A record crowd was present at the Christmas Valley Lodge to see the presentation March 5 at the annual meeting of the Fort Rock-Silver Lake Soil Conservation District.

Darrel Bowen accepted the plaque for being named top conservation farmers of the year.

The district supervisors said they were impressed by the brothers' well-balanced operation--utilizing forage produced on the ranch in a newly developed feedlot.

Ranch A Showplace

The uniformly high crop production, plus quality livestock, has made this ranch a showplace for folks visiting Christmas Valley.

Last year the award was won by Mable Schumacher, who owns and operates the pioneer Lane Ranch three miles northwest of Silver Lake.

Mrs. Schumacher's leadership in improving native meadows for hay and pasture with controlled use of water for irrigation as well as range development by grazing management and beef cattle improvement were cited in determining the coveted selection of

Deer Trip Planned

A field inspection trip to the Silver Lake mule deer winter range is planned by the Oregon Game Commission for Saturday and Sunday, April 6-7.

conservation farmer of the year.

The award is part of a national program sponsored by the Goodyear Tire & Rubber Co.

Fairways, Greens Seeded at Christmas Valley Course

All 9 greens of the Christmas Valley golf course have been seeded with a special strain of bent grass, according to Phil Washington, general project manager.

In addition, about 3000 pounds of special blue grass has been sown on eight of the gently rolling fairways of the course. All fairways are expected to be seeded by April 1, weather permitting.

In the fall of the year, Italian Rye grass will be planted to bolster and give an added base to the lush fairways.

More than 400 trees already have been planted around the golf course. Most are native to the area, pines, poplars, elms, cottonwoods and silver maples.

"All we do now is to pour the water to the course and watch the grass grow," said Washington.

About 3 miles of pipeline has been installed for the golf

course water system. Newest sprinkler heads are used. These sprinklers can cover a circle of 180 to 200 feet and deposit 3/4 of an inch of water every hour of operation.

The scenic Christmas Valley Course will be 9 holes and will measure 3405 yards but can be extended to 3550 yards for tournament play. It is a sporty layout, demanding accuracy and shot placement to avoid trouble.

Oregon Livestock Prospects Good for 1963

Oregon livestock prospects are promising for 1963, but cattle and hog prices are likely to average slightly lower than in 1962. Lamb producers may experience their best market year since 1957.

These trends are indicated by recent and prospective changes in livestock numbers, marketings and demands in the year ahead, reports Stephen C. Marks, Oregon State Uni-

versity extension agricultural economist.

Prices Improving

Oregon cattle prices have been improving the past 18 months mainly because the expected increase in national beef production failed to materialize. Beef output in 1962 was nearly the same as in 1961, while population gained almost two percent.
