Christmas Valley's 18-Mile Paved Road Ready By Sept. 15

A few days ago, as I gathered material for an article on progress in Christmas Valley, I began to think about the drastic changes which have also taken place in my way of life.

I doubt if anyone can appreciate the development of Christmas Valley as do those of us who lived here before its conception.

Two years ago, it was a 25-mile trip to the nearest post office, 25 miles to the nearest grocery store and gas station, and 110 miles to the nearest "shopping center." Social life was confined to an occasional country dance and infrequent visits with the "neighbors."

We did without many of the so-called necessities of life. To us they were luxuries but we felt it was worth it. We gained so much in so many other ways. Now, thanks to our unforeseen good fortune, we feel we "have our cake and can eat it too."

Provided Many Facilities

Christmas Valley developers have provided us with the things most people take for granted, post office, grocery store, service station, laundromat and Church. The Lodge has become a social center for local people who come from miles around for club meetings and "dinner out."

Dances are held often at the Recreation Building, and all of us enjoy either boating, fishing, swimming or water skiing at the Lake. Some of us have even taken up golf! New friends are found as Christmas Valley land owners come to see their land or become a new resident.

Freedom From Congestion

We still enjoy our freedom from congestion our wonderful climate, with blue skies and fresh air, without the contamination of smog, and the healthy way of life, both physically and mentally possible for us and our children.

continued on page 2

ROAD PAVING WORK AHEAD OF SCHEDULE--Cliff Partin, county road foreman (left), and Virgil Hall, local heavy equipment operator who has done a big job on the project, check over progress made in Townsite section of 18-mile asphalt paved road. New road, which runs from Christmas Valley to Arrow Gap Road to State Highway 31, is expected to be completed Sept. 15. Twelve miles of the road in Townsite is already being used.

Water Lines Installed in Townsite Unit 3, \$90,000 Now Expended on Overall Program

Water line installation work in Unit 3 of the Christmas Valley Townsite has been completed, making three units ready for fresh water delivery to homes.

"We've plunged right into laying water lines in Units 4 and 5," said General Project

Manager Phil Washington, "and will continue to expedite work on the entire water system."

"We've already expended \$90,000 of the total \$300,000 earmarked for the overall water program. We hope to complete this giant project by

October, 1964," Washington revealed.

"We have full crews working all the time and are getting two big loads of pipe a month to enable us to keep ahead of schedule," he added.

Washington had to chuckle when he recalled his promise to provide special service to

continued on page 6

\$80,000 IN CONSTRUCTION WORK FOR HOMES, BUSINESSES HERE

A whopping \$80,000 worth of construction is in the works at bustling Christmas Valley, it was reported by Project Manager Warren Morton. Construction representing \$55,000 in value is in various stages of completion.

Morton said the figure represents seven different structures all in the Christmas Valley Townsite. He added that the M. Penn Phillips Co. has committed loans on the seven properties.

Already completed is the home of Mr. and Mrs. Stacy

Jackson, which is located in Unit 4. The Bud Arnolds expect to have their Holiday House completed sometime in Sept.

Coy Amaker is acting as owner-builder of his own special 2-bedroom home. Foundation was poured for the Chuck Banteir home and the framework completed for their Christmas Valley Beer Tavern.

Another \$26,990 is earmarked for the proposed construction of two more homes, Morton said.

12 Miles of Paving Done in Townsite

The 18-mile asphalt paved road from Christmas Valley Townsite to State Highway 31, which is expected to be another major factor in the further development of mushrooming Christmas Valley, will be completed about Sept. 15, president Carlo P. Giuntini reported.

"More than half of the vital paving program has been completed," Giuntini said, "and work is in progress on the next section from Unit 6 of the Townsite to the Buick Ranch, then Arrow Gap Road to State Highway 31."

Joint Effort

"The M. Penn Phillips Co., which contributed \$55,000 to this joint effort by Lake County officials and local citizens, is greatly indebted to these various agencies and community - spirited merchants, ranchers and residents who contributed so much," said Giuntini.

Giuntini said a 12-mile stretch of Christmas Valley Road, just outside the Lodge area to Arrow Gap Road, has been paved and already in use. Another 6 miles of paving is due on Arrow Gap Road to where it intersects Highway 31.

Final Paving in Townsite

The final paving will be through the heart of Christmas Valley, from the Lodge to the end of the Air Park airstrip.

FREE LETTER CONTEST EXTENDED UNTIL OCTOBER 15 DEADLINE

We must confess; we're in a bind. We've received so many fine letters from Property Owners in our letter contest, "Why I'm Happy I Own Land in Christmas Valley," that our competent staff cannot properly handle the load of entries.

We'd like everyone to have a fair chance to win the valuable prizes, so we'd like to have more time to read carefully and judge your letters. Then too, some readers said they were on vacation and didn't have time to enter the contest.

We've decided, therefore, to extend the entry deadline date one month. We'll continue to accept letters dated up until October 15.

We'd like to read about astute reasons for purchasing land in progressive Christmas Valley. You can win one of three valuable prizes doing it, too.

So take pen in hand and tell: "Why I'm happy I Own Land in Christmas Valley."

For the best three letters received we will give these valuable prizes.

FIRST PRIZE--An allowance of \$150 on the balance of the winner's account.

SECOND PRIZE--An allowance of \$100 on the balance of the runner-up's account.

THIRD PRIZE--An allowance of \$50 on the balance of the third-place winner's account.

THE RULES ARE SIMPLE:

1. In 150 words or less tell why you invested in Christmas Valley, your attitude and reasons why "I'm Happy I Own Land in Christmas Valley."

2. Prizes will be awarded on the basis of sincerity of feeling on the part of the writer. Use words and phrases that come naturally. Grammar and spelling have no bearing in the judging. Letters should be typewritten but will be accepted in handwriting if legible.

3. All entries must be postmarked on or before the day the contest closes.

4. The winning letters will be published in the Christmas Valley Gazette.

5. If possible, please enclose a snapshot of yourself. We would like to publish your picture along with your winning letter.

6. As is the procedure in such contests, all letters and snapshots received become the property of the M. Penn Phillips Co. and may be published in whole or part. In all cases full credit will be given the writer.

7. SEND LETTERS TO: M. PENN PHILLIPS COMPANY
740 No. Loren Ave.
Azusa, California

LIKES LAYOUT OF TOWNSITE

Gentlemen:

Have just returned from Christmas Valley. I will say I am pleased with my townsit lot and with the layout of the town itself.

I know it will take time to complete all the projects and the roads for better traveling and it should be a beautiful place in the near future.

I want to thank "Atch" for his time and helpfulness in showing me around the entire project.

Stayed over night in the Christmas Valley Motel and enjoyed the clean, fresh air. Hope to move up to Christmas Valley in about four years or so.

Sincerely,
(Signed) Robert E. Alvord
El Monte, Calif.

Credit Given Where Credit Was Due

A recent story in The Oregon (Salem) Statesman told of the rarity of a colt born to a 22-year-old mare. Experts attributed this feat to the hormone injections given the mare.

Our Christmas Valley correspondent, Betty Morehouse, wasn't overly impressed by the story.

"Our 22-year-old quarter-horse mare, Sloan's Patty, gave birth to a lively filly

colt on June 23. We attribute this," said Betty, "to our Thoroughbred stallion, Princeton King, formerly owned by the late Leo and Genevieve Hanks of Lakeview."

Travelers Welcomed

Sixteen highway entrances into Oregon all now have 152-foot green mats, reading "Welcome to Oregon," as a greeting sign to all travelers entering the State.

ROAD GETS COATING--Operator directs pouring of hot oil from Spray Rig on road in Christmas Valley Townsite. Asphalt will next be mixed with road material, compacted and sealed with asphalt armor-coat.

Road Paving Completed Sept. 15

continued from page 1

General Project Manager Phil Washington said the 18-mile stretch of road will provide excellent access to all recreational facilities in the region.

"You can drive north to Fort Rock on the Arrow Gap Road or south until you hit State Highway 31. This joins U.S. Highway 395 and Oregon Highway 97. It means you'll be able to drive easily from Christmas Valley to La Pine, Silver Lake, Bend and Lakeview. And people from other spots can see our growing Christmas Valley development," said Washington.

\$200,000 in Equipment

Washington pointed out that the road paving is a major project. "There is \$200,000 worth of equipment out there. There are also 15 men working every day of the week. On Saturdays and Sundays, men are hauling thousands of cubic yards of gravel from Picture Rock Pass, north of Silver Lake, just so we can stay with the job.

"The 15 men working on the project are living in our new Recreation Building and are eating--family style--at the Lodge," said Washington.

Cliff Partin Supervises

The Lake County Road Department, under the supervision of foreman Cliff Partin, has laid 390,000 lbs. of MC 250 asphalt, which is a binder for the base and is similar to macadam. Asphalt mixed with existing road material is compacted and sealed with asphalt armor-coat.

The asphalt is trucked in from the American Bitumuls & Asphalt Co. in Portland. It is reheated to 400 degrees in a portable retort (heating unit) and poured on the road. This portable heating unit has been moved to the Buick Ranch at Arrow Gap Road.

Virgil Hall Knows How

County Road Foreman Cliff Partin, Project Manager Warren Morton and Virgil Hall all expressed pleasure with the progress of the road paving.

Hall, heavy equipment operator, has done a tremendous job with his know-how (background he picked up at Hesperia, Calif.) and generosity in providing equipment and labor. "He's been just great," said Washington.

Al Baert, local merchant and contractor, who provided the grading; Bob Morehouse, Jess Miles and Kob Buick, local ranchers who provided water stations, were also singled out for their cooperative efforts.

President Giuntini told residents: "When this road is finished, we're going to celebrate the occasion by holding a street dance in the vicinity of the Lodge. Everyone is welcome to join the festivities."

Nine Carloads of Uranium Ore Shipped From Local Mine

Nine carloads of uranium ore were shipped last month from the Lucky Lass Mine, according to Bob Adams, one of the owners of the Lucky Lass properties. The shipments were the first of the season.

About six more carloads are in the present stockpile, Adams said.

The ore is shipped to Vitro Chemical Products of Salt Lake City, Utah, where it is reduced to Uranium Oxide (U 308). Last year the Lucky Lass mine owners shipped 32 carloads of uranium ore.

Clair Smith, another of the owners, is working the mine along with Harry Morris and Wes Reichart. Other owners of the Lucky Lass are Don Lindsey and Choc Shelton.

More Exploratory Digging

The ore is being taken from the bottom of the pit which was dug on the Lass property last year under contract by Jess Roberts. After the ore is mined, it is hauled to the railroad siding by Lakeview Logging Company.

Adams also said a mining expert from Vitro was recently here to advise the owners on modern mining methods and future operations.

New exploratory digging went down another 50 feet below the floor of the open pit, which indicates the extent of the operation conducted in a year's time.

State Building Up

Contracts in May for future construction in Oregon totaled \$46,957,000, up 19 per cent over May, 1962, the F. W. Dodge Corporation reported.

Local Booster Club to Meet on Sundays

The San Gabriel and Pomona Valley Property Boosters Clubs who have fun gathering at the M. Penn Phillips Co. offices at 742 No. Loren Ave., Azusa, will have new meeting times, vice-president Penn Thayer announced.

Henceforth, meetings will be held at the company offices only on Sundays. There will be two meetings, however, one at 2 p.m. and another at 6 p.m.

Christmas Valley Property Owners have enjoyed these meetings, which are well attended. Coffee and donuts are served, following a presentation of up-to-date information on developments at Christmas Valley and a showing of recently taken color slides.

Plan to attend the meeting next Sunday and meet your future Christmas Valley neighbors. If you wish to attend the meetings, please write Penn Thayer at the company offices.

Boeing Leases 100,000 Acres in Oregon

Boeing Aircraft company and the State of Oregon have concluded an agreement for Boeing's occupancy and use of the 100,000-acre Boardman site in Morrow County.

Oregon Governor Mark Hatfield announced the signing of the lease agreement, following approval by the State Land Board. William M. Allen, president of Boeing, signed for his company.

The lease gives the Seattle (Wash.) based aerospace company use of the site for industrial research and developmental purpose until the year 2040. It provides for annual rental payments by Boeing of \$60,000 a year.

"This has been a long and difficult project, involving complicated and lengthy negotiations with five Federal government agencies and many private individuals," Governor Hatfield said.

Benefits Entire State

Hatfield pointed out that the effort was worthwhile.

"In terms of potential benefits to the economy of the Mid-Columbia area and of the entire state, in bringing to Oregon one of the nation's leading science-based industrial companies, the project has been more than worth all of the effort expended," he said.

PENN POINTS

continued from page 1

I live here because I love this country. I wasn't born or raised here but I chose this place above all others. This makes it MY country and I have enjoyed the enrichment of my life and a very special pride during the growth and development of Christmas Valley these past two years.

... Betty Morehouse

SPARKLING SERVICE STATION--This spic and span Mobil station, operated by Larry Porter, is doing big business. Porter, who pumps 8600 gallons of fuel a month, reports business volume of \$6000 gross a month. Station carries complete line of tires, batteries and accessories. Larry does tune-up jobs and even major repair work.

MOBIL SERVICE STATION PUMPS 8600 GALLONS OF FUEL A MONTH

The Christmas Valley Mobil Service Station, under the management of Larry Porter, is doing very well, thank you. As a matter of fact, Porter says it's even better than that.

Porter's volume of business at his neat station is \$6000 gross a month.

"I've been pumping an average of 8600 gallons of fuel a month, which includes regular auto gas, aviation gasoline and diesel fuel," he said.

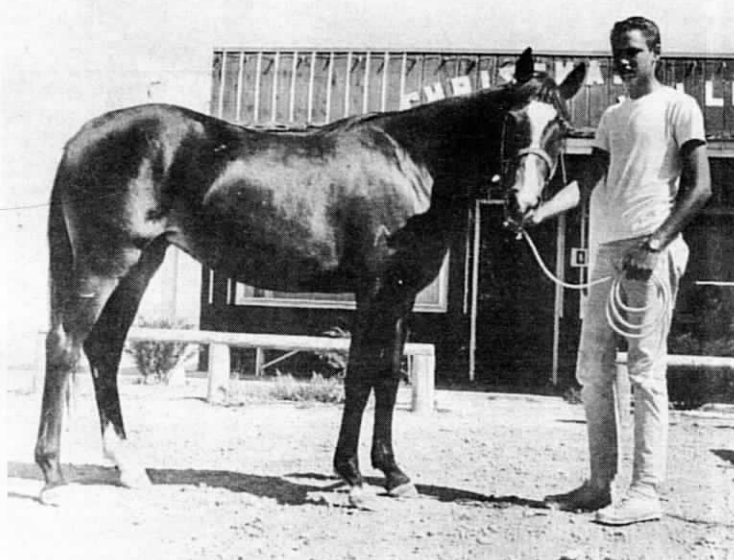

Does Major Repairs

The service station carries

a complete line of tires, batteries and accessories. In addition, Porter does tune-ups and other minor and major repairs.

Neighboring ranchers find the Mobil Service Station a handy place where they can obtain bulk gas and diesel fuel from a bulk plant at the station.

Two fuel pumps near the airstrip provide visiting planes with 80 and 100 octane fuel. The station is conveniently located on Christmas Valley Road at the Air Park.

PROUD OWNER OF HORSE--Chip Washington, son of general project manager Phil Washington, is a mighty happy young man as he shows off his new horse, Pumpkin. Two-year-old thoroughbred was a gift from his Dad, who purchased horse from Rube Long. Chip has spent two summers at Christmas Valley.

Elk Permit Application Deadline Sept. 3

Holders of regular elk tags who want to file for an antlerless elk permit, must have their applications in the Portland office of the Game Commission by 5 p.m. on Sept. 3. Application must be made on the form that is furnished with the regular elk tags.

Party applications are limited to two persons. Persons who received an antlerless elk permit in 1961 or 1962 are ineligible this year. Those successful in obtaining a 1963 permit are not eligible to apply for the next five years.

A total of 3475 antlerless elk permits are being issued

for 14 Eastern Oregon management units. The drawing for these will be held at 10 a.m. on Sept. 10.

ANGELLIS HOST

Guests of Mr. and Mrs. Bruce Angell were her son and daughter-in-law, Mr. and Mrs. Galen Hassen of Pacoima, Calif., their children, Teresa and Pamela, and Angell's nephew and wife, Mr. and Mrs. Bill Angell of Seattle, Wash., and their children, Linda, Tom, Jerry, Mike and Debbie.

Linda has decided she wants to stay in Christmas Valley for several weeks with her grandparents.

\$11,000 Worth of Equipment Installation Makes Well No. 4 Fully Operative for Water System

Equipment valued at \$11,000 has been installed to make Well No. 4 fully operative, according to Penn Thayer, president of the Christmas Valley Mutual Water Improvement District.

"We've equipped the well with a 75-horsepower pump and have installed pressure valves and regulators," said Thayer. "You might say Well No. 4 is now the biggest contributor to Christmas Valley water supply system."

Thayer also disclosed a change in use of water from the four wells.

"We've decided that for top operational efficiency, it would be best to use water from Well No. 4 to supply the Townsite. We've switched No. 2 so it exclusively will supply water to the golf course since it is so close to it.

"Water from the other wells will also serve the Townsite. Excess from all four wells will be used to keep up the

level in the Lake," said Thayer.

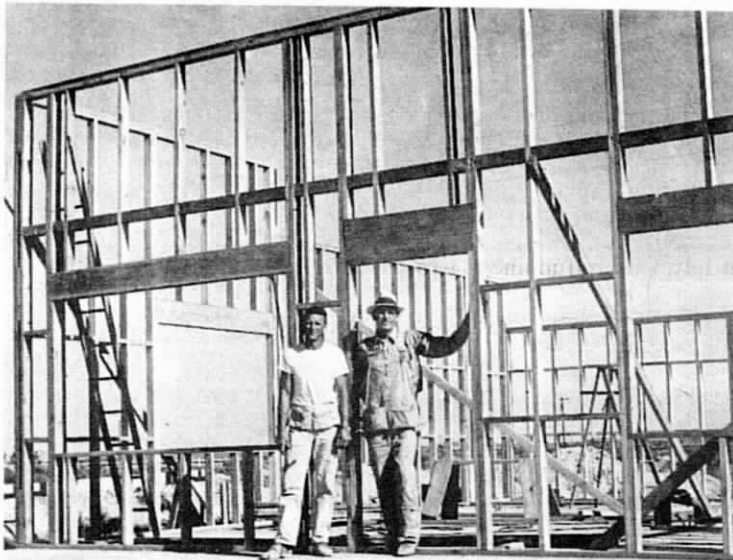

Well No. 4 is the largest of the four wells and is a veritable gusher, capable of producing 2300 gallons of cool, pure water a minute.

Water from Well No. 4 was classified as soft water by a Portland laboratory. Chemical analysis showed the water contained 3 parts per million of fluoride, which is equal to what normally is added to regular drinking water, according to the chemist.

Well no. 4, which is located in Unit 1 of the Townsite, just south of the Air Park, was drilled to a depth of only 302 feet. The water temperature was 60 degrees and the water static 19 feet.

The well is cased and sealed with 120 feet of 12-inch casing.

Additional wells will be drilled as the need for them materializes, Thayer said.

FRAMEWORK FOR TAVERN--Carpenters Coy Amaker and Owen Holmes take breather during work of building the Christmas Valley Beer Tavern, which is expected to be completed on Sept. 15. Chuck and Lola Banteir are owners.

CHRISTMAS VALLEY BEER TAVERN DUE FOR COMPLETION SEPT. 15

There'll be a tavern in the town about Sept. 15. That's the expected completion date of the Christmas Valley Tavern on Christmas Valley Road between the Mercantile Store and the Sales Office.

Charles (Chuck) Banteir and his wife, Lola, will manage the beer parlor where local residents can relax after a tough day at the office.

Banteir, who moved his family to Christmas Valley from Canoga Park, Calif., last month, said he hopes to expand the beer tavern to include a restaurant.

A beer and wine license, now in the name of the M. Penn Phillips Co. for use in

the Christmas Valley Lodge, will be transferred to Banteir.

Local citizens have asked the Phillips Co. to do this so that the Lodge can be strictly a family clubhouse, dining and meeting place. Eventually, the Christmas Valley Recreation District is expected to take over the management of the Lodge from Phillips.

The Banteirs, who have two young girls, are building a Western style, 3-bedroom home near the Dude Ranch area. Chuck says he wants to open the restaurant as soon as possible. "I want all the good people here to sample some of my wife's cooking. She's wonderful," says Chuck proudly.

Oregon Game Commission Lists Early Hunting Seasons, Limits

The Oregon State Game Commission announced the following dates and bag limits for the early hunting season:

DOVE AND PIGEON

Open season from Sept. 1 through Sept. 30. Bag limit is 10 doves a day and 20 in possession. Limit on pigeons is eight a day and eight in possession.

SILVER GRAY SQUIRREL

Open season Sept. 1 through Oct. 31 in Southwest area. Entire year in Northwest area. Bag limit is four daily and in possession in Southwest area. No limit in Northwest area.

BLUE AND RUFFED GROUSE

Open season Sept. 7 through Sept. 15 in western Oregon and Sept. 7 through Sept. 22 in eastern Oregon. Bag limit is three daily in the aggregate and six in possession.

SAGE GROUSE

Open season Sept. 7 through Sept. 15 in Harney County and that part of Malheur County south of U.S. Highway 20. Bag limit is two daily and in possession.

CHUKAR & HUNGARIAN PARTRIDGE

Season opens Sept. 7. Closing date unavailable because of late meeting of Game Commission. Bag limit is eight daily in the aggregate and 16 in possession.

10 Commandments of Gun Safety Make Big Difference Between Happy Hunting, Tragedy

The big game and waterfowl hunting season in Oregon soon will be underway. Along with the animals, many hunters will be killed, some through their own carelessness, others through no fault of their own.

All hunters are urged to obey the 10 commandments of gun safety. The difference between happy hunting and tragedy may well lie in obeying these commandments:

1. Treat every gun with the respect due a loaded gun.
2. Watch that muzzle! Carry your gun safely. Keep safety on until ready to shoot.
3. Unload guns when not in use. Take down or have actions open. Gun should be

carried to shooting area in cases.

4. Be sure barrel is clear of obstructions and that you have ammunition only of the proper size for the gun you carry.

5. Be sure of your target before pulling the trigger. Know the identifying features of the game you're hunting.

6. Never point a gun at anything you don't want to shoot. Avoid all horseplay.

7. Never climb a tree or fence or jump a ditch with a loaded gun. Never pull a gun toward you by the muzzle.

8. Never shoot a bullet at a flat, hard surface or water. The bullet ricochets. At tar-

get practice, be sure your backstop is adequate.

9. Store guns and ammunition separately, beyond the reach of children.

10. Avoid alcoholic beverages before and during shooting.

These 10 hunter safety commandments were heartily endorsed by Christmas Valley Property Owner Bob Hall, who is also the manufacturer of "Saf-Gun," a locking device which prevents guns from being fired accidentally or intentionally.

Hall said he is planning to assemble and ship 25,000 of these Saf-Gun locks here in Christmas Valley. Hall said he intends to build a combination factory, gun shop and sporting goods store next to the Sales Office.

Hall, who said his "total operation will gradually move to Christmas Valley within three years," declared he will take out national advertising in the October issue of American Rifleman.

Pete Holmquist and Fred Thistle, both property owners with great interest in the development of Christmas Valley are joining Hall in the venture.

FRED KENNEDY

Painting and Paper Hanging

Christmas Valley R.S.

Silver Lake, Oregon

GREEN GETS FACE LIFTING--Leroy Newport is shown operating aerifying machine on green of golf course. Digging these holes prevents packing of soil, enables water to penetrate deeper and gives grass a better base. All the greens on the course, plus the putting green near the Lodge, got this treatment. Course and greens look lush.

GOLF COURSE SAID TO BE RUGGED TEST

"I think president Carlo Giuntini, who personally designed the Christmas Valley Golf Course, got carried away a little. I think it's really going to be a tough course with all those rolling and twisting greens."

That was the appraisal of the sporty 9-hole layout by General Project Manager Phil Washington.

"Course superintendent Joe Ward and I walked the 9 holes, checking the course," said Phil. "Although it's a rugged test, it's also a beautiful course."

Both agreed the course looked absolutely lush. "We've just got to wait for the grass to fill in the bare spots and then the course will be ready to open," said Ward.

Ward added that all of the fairways and greens have been mowed a couple of times.

"We've even had to spike the greens (aerate by digging circular holes) so the greens will have a good solid base. We're keeping things going full speed. It's just a matter of getting the grass to blend fuller," said Ward.

To keep the course looking lush and green, a million gallons of water a day is dispersed over the fairways and greens through the automatic sprinkler system. About 3 miles of water pipes have been installed for top maintenance.

The scenic Christmas Valley course will measure 3405 yards but can be stretched to 3550 yards for tournament play. It will play to a par 36. A very difficult par 36.

"Pork on The Farm" Booklet Available to Gazette Readers

An interesting 48-page booklet on the slaughtering, cutting and processing of pork on the farm is available to Property Owners free of charge.

The illustrated publication, Farmers' Bulletin No. 2138, may be obtained by writing to Penn Thayer, P.O. Box 888, Azusa, Calif.

The bulletin describes and pictures the equipment needed, the proper cutting of the animal, processing, freezing, curing, canning, preparing sausage and cooked products.

Drawings for Smokehouse

Diagrams and drawings are shown for making a smokehouse (plus bill of materials for frame construction and cement-block construction), barrel for smoking hams, and combination water heater, scalding vat and scraping table.

Much interest has been shown in raising of pork since a story appeared in the Gazette pointing out that pork production could become a lucrative agricultural pursuit in Christmas Valley.

Ready Market Here

Of all the pork consumed on the Pacific Coast, 85 per cent is raised elsewhere. This indicates a ready market for animals raised locally.

Paving Scheduled for Trailer Court

Several Christmas Valley facilities will get the new look with asphalt paving. The project will be done at the same time the remainder of the Christmas Valley Road is paved. Completion is scheduled for Sept. 15.

The Christmas Valley Mobil Home Estates, which has 228 mobil home lots; the Own-Your-Own Trailer Site, the gasoline service station, the Lodge areas and portions of the Lake front will have paved areas.

The Own-Your-Own Trailer Court will be given additional features. Several shade trees will be planted around it, and plans are being made to form a park in the area.

Christmas Valley Progress Going at Unbelievable Rate of Speed

Serving the 3,000 acres of townsite will be 30 miles of water line. Ten miles have been installed and 20 miles are under construction. Bright red fireplugs loom incongruously from sagebrush which has not yet been cleared from parts of the townsite acreage.

Four wells have been drilled and are supplying present needs. Six more will be drilled as the water lines are completed.

Over 200 miles of power lines have been erected and many more miles will be built as residents increase.

About 350 miles of acreage roads and 40 miles of graveled townsite roads have been constructed. The 18 miles of road from Christmas Valley to highway 31 is now being surfaced by the Lake County road crew. M. Penn Phillips is contributing \$55,000 towards this project.

A three man surveying crew is at work in the field, and an estimated two years of work will be necessary to complete the surveying of the 85,000 acres included in the project.

25 Houses Built, Families Moved In

Some 25 houses have been constructed through this sprawling community and families have moved in. A recent census showed 350 residents.

A 40-acre Model Farm with a house and outbuildings was constructed by the Phillips Co., and purchased by Mrs. Peggy Daly from Madras. Milk cows, sheep, chickens and farm crops are being raised and produced at this Model Farm.

The total amount spent in Oregon to date for these improvements and projects, including surveying and construction is in excess of \$750,000. The cost to complete these projects will total another \$500,000. Operational costs since November 1961 have exceeded \$105,000.

Budget \$8000 Per Month For Operational Costs

Monthly operational costs budgeted for the balance of 1963 will exceed \$8,000 per month. This included salaries of various residents of the area who have found employment at Christmas Valley. These figures represent a sizeable boost to the economy of northern Lake County.

Between 40 and 60 years ago, the population of Christmas Lake Valley numbered 3500. Power was not available to lift the desperately needed, vast supply of underground water, waiting beneath the semi-arid surface.

With the advent of R E A power, a new era has begun. Rising from the hopes and dreams of deserted homesteads, mushrooming Christmas Valley may soon equal, then pass early population figures.

The following account was reprinted from a story which appeared in the Lake County Examiner. It was written by Betty Morehouse, a Christmas Valley resident who has lived here long before the M. Penn Phillips Co. began its fabulous development of Christmas Valley.

BY BETTY MOREHOUSE

Progress has been going forward at an unbelievable rate of speed in Christmas Valley.

Eighteen months ago, six months after the conception of Christmas Valley, a project office building was in use, two model homes were opened for inspection and the Christmas Valley Lodge was only partially finished.

Landscaping around the Lodge and numerous other proposed projects were only on paper and in the mind of Project Manager, Warren Morton.

Today, an additional wing has been built on the Lodge and landscaping is complete. Green lawns, shrubbery and flowers complement the graceful lines of the spacious Alpine style building. The Lodge has become a social center for local people who come from miles around for "pot luck" dinners, club meetings and just to have "dinner out."

Expect 4000 Visitors at Lodge

Approximately 1400 "outside" visitors signed the guest register this year, during the months of May, June and July, alone. An estimated 4,000 will have signed before the end of the year.

The 40-acre lake near the Lodge shines green some days --blue on other days. Fantastic orange, yellows and reds shimmer from its surface at days end as the sun sinks out of sight at the waters edge.

At night the lighted spillway reflects glints from silver cascades tumbling into the lake. Happy sounds of laughter echo to the Lodge, as swimmers, young and old, enjoy the cool water. Water skiing takes place occasionally as the more intrepid residents attempt this popular water sport.

Five hundred 10-inch and 1,000 fingerling trout have been planted. More trout, bass and bluegill will be planted in the near future. Fishing poles will be a common sight next year.

Bright Green Fairways Surround Lake

Surrounding the lake are the bright green fairways of the golf course. Dedicated personnel are wheeling acres of grass from the embrace of possessive sagebrush. A smooth carpet of grass near the Lodge, sports a putting green, and the driving range is also open.

Joe Ward, Golf Course Construction Manager, has seeded and planted an experimental garden plot near the golf course maintenance building. His eyes gleam with pride as he offers his guests radishes, strawberries, lettuce or carrots, served on paper plates with a side dish of salad dressing.

About a quarter of a mile on around the lake, is another building; a miniature Lodge. This Recreation Building sports modern kitchen facilities, a laundry, showers, a spacious meeting room comfortable divans and chairs around a large fireplace and serves owners of mobile homes.

KING-SIZED VEGETABLES GROWN HERE--You don't need too many vegetables for a salad if you get them this size. Pearl Hamilton (left) shows jumbo beets and carrots, while Hazel Thompson, manager of Christmas Valley Motel, holds giant beets and turnips. Vegetables were grown at the K. O. Buick Ranch in Christmas Valley.

Christmas Valley Mobile Home Estates, boasts 240 mobile home lots, measuring 45 by 80 feet. Owners retain permanent possession and may move their trailers to and from at will. The adjacent transient trailer court has 32 cement pads, and is equipped to handle the biggest modern trailers.

Residents Appreciate Store, Post Office Most

The Christmas Valley Store and Post Office are probably the improvements most appreciated by residents of the area. The store, housed in a new, rustic style building, offers groceries, dairy products, fruit and vegetables at prices comparable to Bend and Lakeview. Owners Al and Connie Baert also carry a line of clothing and hardware and on their weekly trip for supplies, will pick up any item their customers request.

Housed in the same building is the Post Office, with 100 individual boxes. Daughter-in-law, Mrs. Barbara Baert, is Postmaster.

A twelve-unit motel owned and operated by Mr. and Mrs. Fred Thompson, accommodates property owners who come to Christmas Valley to see their land.

Two Offices Available For Rent

A short way west of the motel is the Chris-O-Matic Wash, a modern laundromat owned and operated by Mr. and Mrs. John Pettus. Equipped with six washers and two large dryers, the Chris-O-Matic is patronized by both local and visiting wives and mothers. The Pettus building will also have two offices available for rent.

Aerial Spraying Kills Sagebrush, Rabbitbrush

Aerial spraying of chemicals to kill sagebrush and rabbitbrush has been successfully accomplished on several Fort Rock and Silver Lake ranches.

The spraying is done in early June when brush is growing rapidly. Sites selected have heavy growth of brush, which indicates better soil. After the wilting of sagebrush and rabbitbrush, native grasses use the moisture which had gone to the brush.

This type of ranch improvement is on the increase. Some farmers will even do some fall seeding of crested wheat or tall wheat grasses.

Pool For Better Price

The spraying program had ranchers pooling acreages to secure a better cost price. The program was arranged through the Lake County Extension Service, with Bill Moser in charge of the operation.

Ranchers who took part in this year's spray program were Richard Morehouse, Maurice Ward and Bud Parks, Fort Rock, and Dudley Long and Jess Penington of Silver Lake. Each rancher provided flagmen to insure spraying of the right acreage.

Paul Ortwein of Lakeview provided the spraying equipment, while Merle William of Bellingham, Wash., piloted the Callair spray craft.

DRIVING RANGE RUN BY YOUNG WARD

Young Mike Ward, 11, son of golf course superintendent Joe Ward, is in charge of golf club rental and practice ball sales at the Christmas Valley Driving Range, which is now open for play.

Mike, when not busy at the range, has been showing up the big boys on the putting green, where he generally wins most of the tournaments.

VIEW POINT RANCH COVERS OVER 1,000,000 ACRES

GIANT SELF-PROPELLED IRRIGATION SYSTEM AT WORK--This is the type of apparatus used to water alfalfa field at View Point Ranch. It takes four days for the line to turn a complete circle. At the end of this time, 160 acres will have been irrigated. The entire watering system irrigates 700 acres every four days. The five wells at the View Point Ranch produce 1,452,672,000 gallons of water a year for the big spread.

Prove Range Feed, Beef Production Doubled by Sagebrush Spraying, Range Reseeding

Since 1949, the "animal unit months" of feed produced has nearly doubled, primarily through sagebrush spraying and range reseeding. During the same time, pounds of beef produced per breeding cow has gone from just under 200 pounds to nearly 425 pounds a year.

These were some of the interesting facts revealed by personnel at the Squaw Butte Experiment Station, which is operated by Oregon State University and the U.S. Department of Agriculture. The experiment station conducts research which applies to the 11 Western states.

Pays Off Soon

W. A. Sawyer, station superintendent, significantly points out that the research also relates to about 20,000,000 acres of Eastern Oregon range.

Sawyer said about 4000 acres of sagebrush-bunch-

grass range on the station has been sprayed at an average cost of \$2.25 an acre--a cost that is paid off in about 2 1/2 years through increased forage and beef production.

Higher Quality Grass

More range grass for spring grazing and higher quality grass for late summer are among key goals of the researchers.

Research reports got down to such hard-cash questions as the possibility of fertilizing range grasses with nitrogen and the placing of supplemental feed for yearling beef animals on summer range.

Sawyer said there are two particularly interesting experiments being conducted.

One was the prospect of chemically curing forage grassed to preserve their quality for late season grazing.

Recommend Crested Wheat Grass

Another was test plots of

crested wheatgrass prematurely cured through chemical spray treatment to prevent further decline in protein level. The project is in the preliminary stage since researchers have yet to find out if cattle will eat it, plus the possible effects the chemical spray will have on the following year's grass growth.

A Squaw Butte range management recommendation is that a rancher have no less than 5 per cent of his range in crested wheatgrass for sufficient spring grazing in order to delay livestock turnout on native range until late May.

Bumper Hay Crop Being Harvested

A bumper hay crop is being harvested in the Fort Rock-Christmas Valley area despite showers which earlier slowed down operations.

Ranchers in the area consider precipitation for the year's grass supply and dryland crops as beginning with October rains.

A comparison of rainfall at the Lake, the Poplars and the Fremont weather stations showed a variance of .70 of an inch for the first half of 1963. At Lake, where Jack Gillette keeps records, 6.40 inches were measured; Bud Parks recorded 7.39 inches at the Poplars, and Mrs. Floyd Branch noted 7.10 at Fremont.

Picking Feathers

A proven method for picking feathers from a duck or goose is to grasp small groups of feathers between the thumb and forefinger and turn the hand over in a movement similar to the turning of a key in a keyhole.

1,452,572,000 Gallons of Water a Year Used to Operate Lake County Spread

View Point Ranch, bordering Christmas Valley on the East and encompassing more than 1,000,000 acres of land, is one of the largest working cow ranches in Lake County, Oregon. Even Texas would be proud to claim it as its own.

The ranch, which is operated under the name, West Sacramento Enterprises, Inc., supports 2500 head of mother cows. The

alfalfa yield this year will total about 3160 tons, plus an addition 1925 tons from Vaughn Ranch. One thousand tons of rye hay, will also be produced at the two ranches.

A tremendous total of nearly one and a half billion gallons of water will be sprinkled on the fertile fields of View Point Ranch this year.

Started in 1903

You can see View Point Ranch is really big--even equal to "The Texas Big." How it got to its present size is a story that dates back 60 years ago.

Henry Hatch first homesteaded View Point Ranch in 1903. He built a house and barn, dug a well and produced dry land rye, as did most of the other ranchers in the Valley.

Hatch worked the ranch until 1948 when he sold the land to Archie Matlock. Matlock increased the acreage by buying additional land from Lake County. Matlock continued to develop the land until 1953 when he sold View Point Ranch to Hugh Wahl and Phil Pittman. They, in turn, sold the ranch to a group of California business men in 1955.

These men acquired additional land, including the Vaughn Ranch, bordering on Highway 31, seven miles south of Silver Lake.

Phillips Bought Ranch

The M. Penn Phillips Co. came into the picture here in 1961 when Phillips purchased the famous Z-X Ranch. View Point Ranch also purchased a great part of Z-X range land.

Today, View Point Ranch land stretches for 50 miles, encompasses some 1,000,000 acres and supports 2500 mother cows. Since it is a yearling ranch, calves are held over and sold as yearlings.

Such a vast enterprise needs plenty of water, and View Point Ranch has more than it needs. 1,452,672,000 Gallons a Year

a year to take care of View Point's needs. The wells pump 9700 gallons of water per minute, four days a week for 26 weeks of the year.

Water from the five wells nurtures 900 acres of alfalfa, 320 acres of irrigated grain and 160 acres of pasture.

Part of this land is irrigated by five Valley self-propelled watering systems. Each one is a quarter of a mile, rotating slowly in a circular swing operated by the pressure of the water in the lines.

Hydraulic pistons are attached to each wheel, and timing devices turn the wheels at different speeds. It takes four days for the lines to turn a complete circle. At the end of this time, 160 acres will have been irrigated.

The View Point Ranch

watering system irrigates 700 acres every four days.

Operation of View Point Ranch, under the capable management of Frank Anderson, is similar to an experimental laboratory. Anderson is constantly looking for greater production and yield of the land by trying new fertilizers, new crops, and new agricultural methods to this area.

Experimental plots are seeded and planted every year.

Last year, peas and rye were tried for silage. This year, corn and sunflowers were seeded. Next year, stock beets will be tried. Whichever grows best will be used for silage.

This continual research into modern farming methods is illustrated in haying operations. This year a Haro-Bed machine is being used.

2000 Bales of Hay

One man operates this machine, which automatically loads 64 bales of hay and neatly stacks them. One man and the Haro-Bed machine can stack 2000 bales of hay a day. Anderson says this machine replaces seven men and two trucks to do the same amount of work.

Eight men are employed year-round to do the farming, irrigating and maintaining of equipment.

Five Camps

Sid Munnerlyn tends the wells and pumps throughout the ranch land. An additional six men, including Buckaroo Pat Gage, work only with the cattle, riding herd, gathering and branding. During six months of the year, the men stay at five camps, Elk Butte, Browns Valley, Dominick, Four Corners and Sinks, spread out over the million acres.

WATER LINES continued from page 1

anyone requesting water line installation in the Townsite.

"We had to put in an extension of nearly two miles or about 10,000 feet to service the Stacy Jackson home in Unit 4. We did it, and now Jackson has his hook-up for fresh water delivery," said Washington.

The 3000-acre Townsite eventually will be serviced by 30 miles of water lines.

54,000 Oregon Hunters Seeking Antlerless Deer Hunt Permits

by LeRoy Harrod.
Fishing & Hunting Editor

My column this time will be "This And That" in the world of fishing and hunting. From the Oregon State Game Commission NEWS RELEASE BULLETIN of August 12, 1963: "Final tally of applications for antlerless deer permits received by the Commission prior to the deadline at 5:00 PM August 5th, showed sixteen Game Management Units oversubscribed, which will necessitate a public drawing to determine successful applicants for these units."

"A last minute rush by hunters, prior to the deadline, brought the total applications received a year ago."

Popular hunting areas were filled well over the unit permit quota. These included Fort Rock (the Christmas Valley area), Clatsop, Deschutes, Grissly, Maupim, Maury, Metolis, Ochoco, Paulina, Rogue, Sherman, Silvers, Trask, Warner (Southeast of Christmas Valley), and Wasco.

New Camp, Picnic Grounds

The Forest Service has built 9,700 camp and picnic family units during the past year and rehabilitated 10,000 old ones, states the August issue of "Sports Afield" in the informative column "Report from Washington."

A developed campground site provides fireplaces, tent space, table and benches, and automobile parking spurs,

with water and toilets to be shared by several units.

Basic provisions to be brought in by the camper include tents, bedrolls, cooking utensils and food. Most people elect to use these developed sites, although camping in the 181 million acres of National Forest is quite unrestricted. Those willing to carry food and equipment can camp almost anywhere.

In a forthcoming issue of the Christmas Valley Gazette, you readers will be treated to an article written by Sam Welch, Publisher, Editor and Writer of "The Ozark Fisherman."

The article was featured in the July 1963 issue of the nationally known fishing and hunting magazine, "Outdoor Life." The title of the article is: "How a Specialist Does It... Bull Bass are My Hobby."

Sam tells you, in detail, how, when and where more than 20,000 lunker Bull Bass weighing from 4 pounds to 13 pounds 14 ounces, were caught.

--Leroy Harrod

Information about National Forest roads, trails, camp and picnic grounds can be obtained from the National Forest Supervisors. For a list of the Field Offices, write to: Forest Service, U. S. Department of Agriculture.

THAT'S OUR DINNER FOR TONIGHT-- Johnnie McClister and Mike Cater (right) check nice catch of trout they caught in Christmas Valley Lake. Mike McClister (right) still isn't satisfied and is casting for more dinner. It's a good thing no game warden is around. Catch limit is four but it seems the kids have five trout on the string.

OPERATION AIRLIFT FISH DELIVERS 600

Operation Airlift Fish was successfully carried out last week when 600 fish were flown to Christmas Valley Lake from Azusa, Calif.

General Project Manager Phil Washington and pilot Frank Galgano picked up 600 bass, blue gill and catfish at Happy Jack's Fish Farm in Azusa and transported the fish to their new home. Unfortunately, the fish couldn't take in the breath-taking scenery of central Oregon. They were sound asleep.

The fish were first given several deep breaths of oxygen and then tranquilized into deep sleep. They were put in plastic bags filled with oxygen and put aboard the plane.

Galgano said he began to get rather nervous about the welfare of the fish when he noticed the plastic bags began to expand in flight. However, even the plastic bags became adjusted to the high altitude and simmered down nicely.

Frank and Phil, with the help of Chip Washington and Kerry Putnam, roused the fish from their deep sleep by tossing cold water over them and tossing them into Christmas Valley Lake.

The 600 bass, blue gill and catfish join 2000 other finny friends in the 40-acre Lake. On July 30, 500 rainbow trout and 1500 fingerlings were planted in the Lake.

OPERATION AIRLIFT FISH-- Chip Washington and Kerry Putnam are shown unwrapping plastic bags and freeing fish in Christmas Valley Lake. About 600 fish were tranquilized, placed in oxygen-filled plastic bags and flown here from Azusa.

Zoologist Studying Ancient Fish Bones

Dr. Robert Miller, director of the Museum of Zoology at the University of Michigan, gave an interesting talk to local residents on his findings of prehistoric fish bones.

Speaking at the Christmas Valley Lodge, Dr. Miller said

he and his party spent several days at Fossil Lake collecting fossilized fish bones.

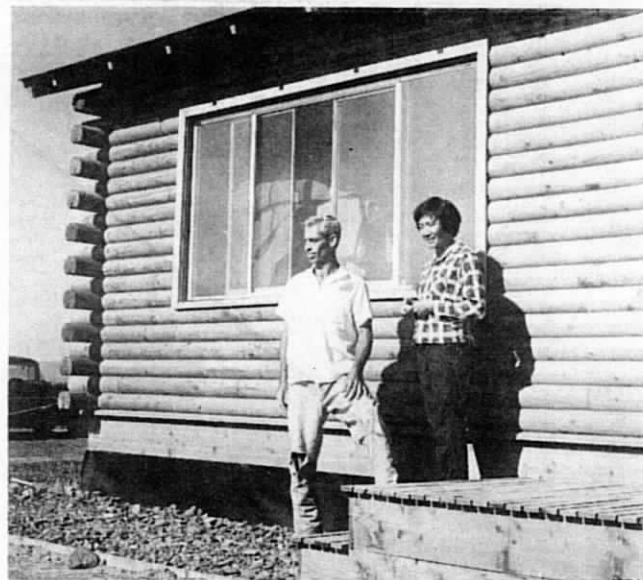

Dr. Miller, who is working on a National Science Foundation Grant, explained that little is known about prehistoric fish, in comparison to ancient mammals and birds.

By collecting fossilized remains and comparing them with skeletons of fish living today, scientists hope to learn more about the secret of life. Dr. Miller found several important fossils in the Morehouse collection which he will take to the University of Michigan for further study and inspection.

Hedgers Bring Baby

Mr. and Mrs. Terry Hedger made a trip to San Fernando, Calif., where they visited relatives and made arrangements to bring back their 3-month-old baby, David.

Hedger is working with the surveying crew here.

PROUD BUILDERS AND THEIR HOME-- Art Pacheco, retired Honolulu fireman, and his wife, Anna, stand in front of their newly completed log house which they built in only three months. They had help from boys, Dennis, 17, and Calvin, 15. All Pachecos were born in Hawaii.

PACHECO FAMILY BUILDS FINE LOG HOUSE IN ONLY 3 MONTHS

Christmas Valley residents welcomed an interesting and talented family to their midst --the Art Pacheco family of four.

Art, his wife, Anna, and their two boys, Dennis, 17, and Calvin, 15, were all born and raised in Hawaii. After buying property here the Pacheco family pitched in and built a fine log house in only three months.

The Pachecos moved here from Long Beach, Calif., where they lived for four years.

Before that they lived in Honolulu, where Art served on the Honolulu Fire Depart-

ment for many years before retiring and moving to the mainland.

Now that his home is completed, Art is looking forward to the opening of the sporty 9-hole Christmas Valley Golf Course.

We'll go out on the limb and predict right now that Art will be the first Christmas Valley golf champion. Actually, it's not much of a gamble, regardless of the many residents here who shoot a fine game.

Championships are nothing new to Art. He's won several in Hawaii, including the Hawaiian Amateur crown.

Mr. and Mrs. Fred Thompson, Proprietors

"Come Up and See Us"

What Our Visitors Say About Christmas Valley

MRS. & MRS. CHARLES WILLIAMS, Eureka, Calif.--
"Making good progress in town area. Farming looks good in agriculture area. Satisfied with look of acreage which we had purchased earlier."

MR. & MRS. RODNEY POST, Coos Bay, Oregon--"We enjoyed the tour of the Valley very much and appreciated the hospitality shown us, plus the courteous treatment."

ELSA M. WINTON, South Gate, Calif.--"Think the area has good possibilities and future. Very enthusiastic about prospects for area. Happy to see progress on improvement of road to highway. Salesman accurately represented property. Nice tour by Mr. Atchison."

MR. & MRS. K.L. TREADWELL, Anaheim, Calif.--"Area seems to be developing well. We enjoyed the tour and can see that much progress is being made."

MR. AND MRS. LUTHER BLAKLEY, Hayward, Calif.--
"We enjoyed the tour and were very impressed with what has already been done and with the future possibilities. We are also very pleased with our property. We expect to try to develop part of our property in the next year. Everyone, especially Mr. Mel Brown, has been very courteous and friendly."

MR. AND MRS. DOYLE HUGHES, San Pablo, Calif.--
"On our first visit to Christmas Valley, we were very well pleased with our property and the progress being made. We were also grateful for the courtesy shown in driving us around and showing everything to us. Thanks a million."

MR. LAWRENCE ANDERSON, Lakewood, Calif.--"Land very level. Good prospects. Marvelous improvements going on in the Valley. Hope to settle down here soon."

MR. AND MRS. PAUL GIBBONS, Santa Ana, Calif. --
"We were well pleased with our land."

MR. AND MRS. DICK TANAKA, Seaside, Calif.--Vast improvements since we were there two years ago. Really enjoyed the tour of our property. Plan to be back again."

ROY A. KYLE, Orcutt, Calif. --"I enjoyed the tour very much. I think I made a wise choice in selecting my property."

MR. & MRS. EDDIE WILSON--"After having been here on July 1, 1962, and coming back to visit in July 27, 1963, we find a great improvement. The Valley is beautiful."

MR. AND MRS. D. AKINA, Campbell, Calif.--"We enjoyed the rodeo show. The children can't understand why we don't have horses. We were pleased and astounded by the growth and development."

R. F. & E. BARNES, Los Angeles--"We are very well pleased and like the overall improvements. The climate is fine. Are planning to come here for good in five years."

MR. & MRS. WALTER BECKER, Pomona, Calif.--"We were very pleased after seeing the Valley and property."

MR. & MRS. FREDERICK STUMP, Oakland, Calif.--"Well satisfied with the Valley. Surpassed our expectations. Beautiful country."

MR. & MRS. DAVID EDWARDS, San Diego--"I am very pleased with the courtesy of the Project's personnel and the development. My family and I desire to grow with Christmas Valley in the very near future."

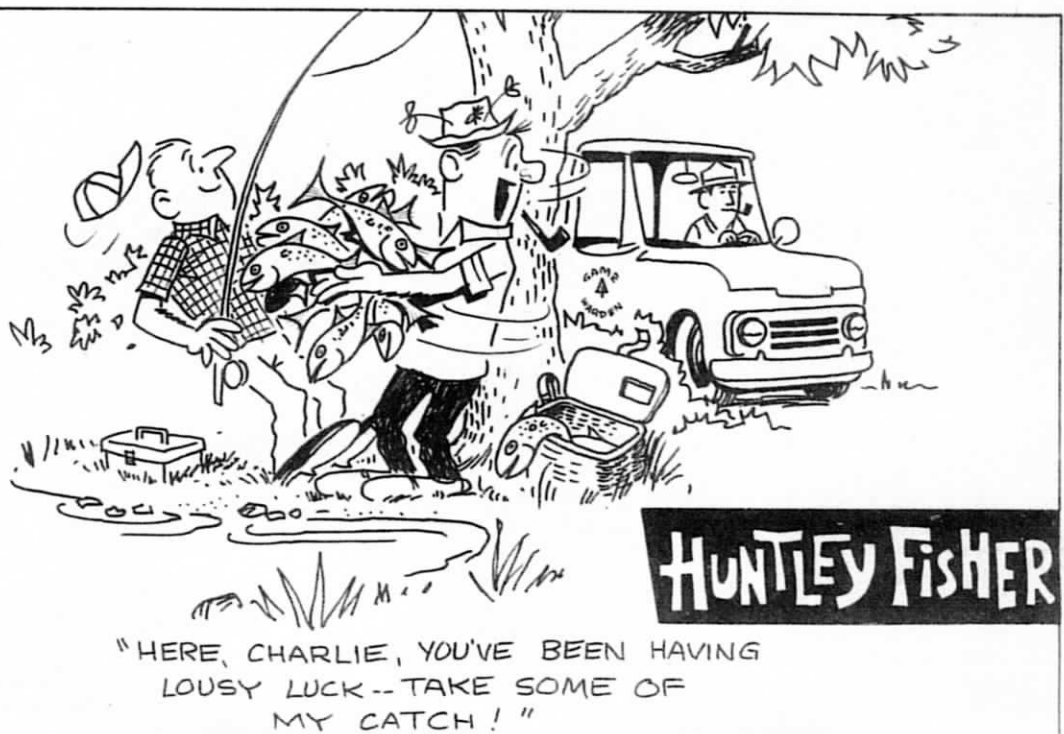

MR. & MRS. A. A. PIAZZA, Hawthorne, Calif.--"I enjoyed the tour and all the information Mr. Brown gave. I liked what I saw and wish we could move in today."

MR. & MRS. WILLIAM ROADRUCK, Ridgecrest, Calif.--
"Pictures shown seemed authentic. We do not regret investing in Christmas Valley. It seems to have a great potential value. We are looking forward to seeing it after improvements have progressed."

MR. JEROME A. MURPHY, Belmont, Calif.--"Very interesting property. Looks like good future investment."

MR. & MRS. D. R. THOMPSON, Menlo Park, Calif.--"Lots of work has been done. Prospects for the future look good."

MR. & MRS. G. K. WALKER, San Diego--"Enjoyed the tour and think this land is beautiful and spacious. Wasn't impressed by main road coming in BUT very impressed after reaching Christmas Valley."

Visitors From Germany, Canada Among 1400 Who Have Signed Ledger at Lodge

So many out-of-state visitors have appeared at the \$100,000 Christmas Valley Lodge that local residents no longer consider it a novelty. However, their interest was rekindled with the appearance of guests from Germany and Canada during July.

An even more distant tourist is expected in September. Sival J. Oliveira Jr. of Tai-

pei, Taiwan, Free China, has made a reservation to stay at the Christmas Valley Motel Sept. 6-8.

About 1400 people signed the ledger at the Lodge during May, June and July. Ed Cater, manager of the show-place of central Oregon, predicts 4000 will have visited the Lodge during 1963.

During July, 483 guests

signed the book at the Lodge. Of this number 53 per cent were from California and 32 per cent from Oregon. The other 15 per cent included visitors from 24 different states.
